Terracon Project No. 66177180

Dear Mr. Bodhaine:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Proposal No. P66177180 dated December 21, 2017.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
Terracon Consultants, Inc.

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. P66177180 dated December 21, 2017, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and Client Scope of Work. The ESA was conducted under the supervision or responsible charge of Kent Wheeler, Environmental Professional. Aaron Ezzell performed the site reconnaissance on January 15, 2018.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is approximately 2,783 acres of undeveloped land location within the boundaries of the Mesa del Sol property. While the Mesa del Sol property includes developed buildings, roads, and utilities, the site as defined for this assessment excludes all developed portions of the property.

Historical Information

Based on a review of historical records, the site has consisted of undeveloped land from before 1935 through the present. The south and east sides of the site are also undeveloped scrub land. Developed areas within the site boundary have been excluded from the site.

Development of the adjoining properties west of the site began sometime between 1935 and 1951 with the construction of a trap shooting range west of the southwest portion of the site. In the 1970s several commercial facilities were developed along Broadway Boulevard SE, which adjoins the northwest portion of the site.

Development along the north side of the property includes the COA South Broadway landfill which is adjacent to portions of the site. The landfill was developed in the 1970s and continued to operate until 1989. The landfill reportedly was not lined and extends to depths of approximately 40 feet, with groundwater at depths of 200 to 400 feet. Based on a review of the City of Albuquerque and Bernalillo County South Broadway Landfill Post-Closure Certification report dated July 29, 2016, the former landfill does not represent a REC to the site.

Development of properties within the site boundary, but not included as part of the site, began in the 1980s with the construction of the COA Sludge Amendment facility in the central-northwest portion of the site, which operated from 1981 to 1989. Based on a review of the City of Albuquerque and Bernalillo County South Broadway Landfill Post-Closure Certification report

dated July 29, 2016, the former COA Sludge Amendment facility does not represent a REC to the site.

Between 2004 and 2014, Albuquerque Studios, a residential development, and several commercial buildings were constructed within the Mesa del Sol property. Between 2014 and 2018, several other buildings have been constructed as a part of the Mesa del Sol mixed use development. No RECs were identified as a result of the historical review.

Records Review

The site was not identified on the regulatory database or in records provided by local agencies. Facilities in the vicinity of the site were identified, as described below.

Broadway and Murray / Mountain View Remediation / CEI Enterprises, 6501 Broadway Blvd: This facility is located west of Interstate 25 at a hydraulically up-gradient location has nitrate impacts to soil and groundwater. The Voluntary Remediation Program (VRP) database described the Conditional Closure, specifying that instructional controls have been emplaced, described as a deed restriction and site drainage structures. A Covenant was issued October 27, 2006. Based on the conditional closure and institutional controls, the nitrate contamination represents a Controlled Recognized Environmental Condition (CREC) to the site.

Valley Livestock Auction Inc., 7715 Broadway SE: This facility is located west-adjacent to the southwestern portion of the site (west of Interstate 25) at a hydraulically up-gradient location. The facility entered the Compliance and Enforcement Program Cleanup Sites (CEPSC) program after nitrate impacts were discovered in domestic well samples above regulatory standards. Based on the proximity and hydraulically up-gradient location, groundwater impacts to the site are likely and as such this facility this facility is part of the REC associated with groundwater impacts to the site.

McCatharn Dairy, 6363 St. Rd 47: This facility is located approximately 120 feet west of the northwestern portion of the site (west of Interstate 25) at a hydraulically up-gradient location. This 25-acre facility is listed on the CEPSC database due to nitrate impacts in the groundwater. The depth to groundwater is indicated to be 80 feet. Based on the proximity and hydraulically up-gradient location, this facility is part of the REC associated with groundwater impacts to the site.

New Mexico Terminal Service / Formerly Cal-Maine Egg Farm / Foods / Sunny Fresh, 9615 Broadway SE: This facility (VRP ID# 53161001) is located approximately 450 feet west of the site at a hydraulically up-gradient location. The facility was entered into the Compliance Enforcement Program Cleanup Site (CEPCS) program on an unspecified date for nitrates in soil and groundwater. The depth to groundwater beneath the facility is indicated to be 20-75 feet. Groundwater samples collected from monitoring well MW-9, the easternmost monitoring well in the study and the closest to the site, exhibited elevated concentrations of chloride and nitrate exceeding the NMED's screening levels. The estimated extent of nitrate in groundwater that exceeds the NMED's screening level of 10 mg/L, has migrated onto the southwestern portion of

the site. Based on the evidence that the nitrate plume has migrated onto the site and the ongoing active regulatory case, this facility represents a REC to the site.

Karler Packing (Former), 9151 Broadway SE: This facility (LUST ID# 28825) is located approximately 550 feet west of the site (across Interstate 25) at a hydraulically up-gradient location. This facility is listed on the Compliance and Enforcement Program Cleanup Sites (CEPSC) database for a groundwater nitrate plume. The depth to groundwater is indicated to be 65 feet. Based on the proximity and hydraulically up-gradient location, this facility is part of the REC associated with groundwater impacts to the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Site Reconnaissance

The site is comprised of undeveloped land and dirt roads. Pipeline markers were observed in the western portion of the site. A large soil borrow pit and soil berm were observed on the central to eastern portion of the site, at the end of University Boulevard SE. No RECs were identified as a result of the site reconnaissance.

Adjoining Properties

The site is adjoined by: undeveloped land, Fidelity Investments office building (5401 Watson Drive SE), and, United Poly Systems plastic pipe manufacturing facility (5201 Hawking Drive SE) north of the eastern portion of the site, Bobby Foster Road followed by undeveloped land and the COA South Broadway Landfill north of the central portion of the site, and Allied Crane and Machinery (5724 Broadway Boulevard SE) north of the western portion of the site; undeveloped land to the east and south; University Boulevard SE followed by the Isleta Amphitheater west of the northern portion of the site, Broadway Boulevard followed by A-1 Auto Salvage (5815 Broadway Boulevard SE), CoPart Salvage (7705 Broadway Boulevard SE), C. H. Taylor Construction (7201 Broadway Boulevard SE), Duke City Reds Cement Plant (7707 Broadway Boulevard SE), Abraham Construction (7707 Broadway Boulevard SE), a mobile home manufacturer (7711 Broadway Boulevard SE), Livestock Auctions (7715 Broadway Boulevard SE), CT Inc. chemical transportation (7717 Broadway Boulevard SE), Albuquerque Trap Club shooting range (9617 Broadway Boulevard SE), and, Cal-Maine Foods, Inc. (9615 Broadway Boulevard SE) west of the southern portion of the site. RECs were not identified as a result of the adjoining property reconnaissance.

Previous Reports

Terracon reviewed a Phase I ESA conducted in 2008 (Terracon, March 2008). Terracon identified an REC associated with the potential migration of contaminants associated with the nearby McCormick Ranch explosives test range and adjacent northwest South Broadway Landfill. Terracon recommended additional investigation of this REC if groundwater wells were to be developed on site.

In addition, Terracon reviewed a second Phase I ESA conducted 2015 (Terracon, December, 2015). Impacts of nitrates and chlorides to the groundwater of the site resulting from releases at the Cal-Maine Foods, Inc. facility, located adjacent west of the southern portion of the site, is considered a REC in connection with the site. Terracon recommended the pursuit of a comfort letter from the State of New Mexico indicating that the site owners are not responsible for the nitrate release. In addition, Terracon recommended that consideration should be given to the location of future groundwater supply wells on the site regarding existing groundwater nitrate plumes and more current data regarding the landfill monitoring should also be considered prior to use of groundwater.

Significant Data Gaps

No significant data gaps were identified.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at the Mesa del Sol property in Southeast Albuquerque, Albuquerque, Bernalillo County, New Mexico, the site. The following Recognized Environmental Conditions (RECs) or Controlled RECs (CREC) were identified in connection with the site:

- n **Groundwater impacts from west-adjoining properties:** A nitrate groundwater plume is known to have migrated onto the site from the west-adjoining and hydraulically up-gradient New Mexico Terminal Service (Formerly Cal-Maine Egg Farm), and multiple other industrial facilities located west of the site have known or suspected nitrate, chloride, and/or total dissolved solids (TDS) groundwater impacts. These groundwater impacts represent a REC to the site.
- n **Controlled groundwater impacts from west-adjoining property:** The Broadway and Murray / Mountain View Remediation / CEI Enterprises facility located at 6501 Broadway Blvd has nitrate impacts to soil and groundwater. The facility has emplaced institutional controls, a deed restriction and site drainage structures. Based on these controls, the groundwater impacts represent a CREC to the site.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon recommends the following additional actions.

- n **Awareness of Continuing Obligation(s):** All appropriate inquiry (AAI) establishes landowner liability protections (LLPs) for property owners CERCLA, as innocent landowners, bona fide prospective purchasers, and/or contiguous property owners. In order to use the LLPs under CERCLA, a purchaser must perform all appropriate inquiry

(i.e., their due diligence) before acquiring the property. Part of this due diligence is the completion of a Phase I ESA. Additionally, EPA requires the purchaser to meet ongoing continuing obligations if they want access to the LLPs. These continuing obligations are generally stated below.

1. Compliance with any established environmental land use restrictions.
2. Take “reasonable steps” with respect to hazardous substance releases. Reasonable steps generally include the following: Stop continuing releases, prevent threatened future releases, and prevent or limit human, environmental, or natural resource exposure to existing hazardous substance releases.
3. Provide full cooperation, assistance, and access to authorized personnel to investigate the site.
4. Compliance with Information Requests and Administrative Subpoenas
5. Providing Legally Required Notices with respect to the discovery or release of any hazardous substances at the facility.

Based on the findings of this assessment, Terracon identified a REC for the site; known nitrate groundwater impacts to the site from a former west-adjointing industrial facility as well as possible nitrate, chloride, and TDS groundwater impacts from other west and hydraulically up-gradient industrial facilities. Future development at the site should consider the location of future groundwater supply wells on the site regarding existing groundwater nitrate plume, and should consider the most current available data regarding the landfill monitoring before use of groundwater, as part of the continuing obligations.

1.0 INTRODUCTION

1.1 Site Description

Site Name	Mesa Del Sol
Site Location/Address	Southeast Albuquerque, Albuquerque, Bernalillo County, New Mexico
Land Area	Approximately 2,783 acres
Site Improvements	The site generally consists of undeveloped land with the exception of utilities and paved roadways.
Anticipated Future Site Use	Master Plan Development
Purpose of the ESA	Acquisition & Financing

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are shown on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. Proposal Number dated Proposal Date Long, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and Client Scope of Work. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report.

Included in this ESA is information identified through the review of user-provided information, regulatory databases, and standard historical records, as required by the ASTM Standard. Additional information was acquired through interviews with the owner, key personnel, and local governmental agencies, a walkthrough inspection of the site's accessible areas (interior and exterior), and a visual reconnaissance of adjoining properties.

The ASTM E1527-13 Standard has defined "migrate/migration," as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface," and clarified that the potential for vapor migration should be considered as part of a Phase I ESA. Vapor migration was evaluated when determining RECs associated with the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services,

regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site’s current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of SC3 International LLC and Other Reliance Party. Use or reliance by any other party is prohibited without the written authorization of SC3 International LLC and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon’s Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon’s liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user’s responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Prior to the site visit, Mr. Kyle Bodhaine, client’s representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client’s Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X
Obvious Indicators of Contamination at the site.			X

Mr. Kyle Bodhaine indicated that he has specialized knowledge and experience related to the site or nearby properties, due to his ownership of two buildings located on the Mesa del Sol property. Terracon's consideration of the client-provided information did not reveal any RECs. A copy of the User Questionnaire is included in Appendix C.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 5,000 to 5,300 feet above sea level from west to east respectively	USGS Topographic Map, Isleta (1991), Hubbell Spring (1996) Albuquerque West (1990), Albuquerque East (1990), New Mexico (Appendix A)
Topographic Gradient	Relatively flat with a general gradient towards the west	
Closest Surface Water	The Rio Grande river, approximately 0.7 miles to the west	
Soil Characteristics		
Soil Type	Bluepoint-Kokan and Madurez-Wink Association	Bernalillo County, New Mexico, USDA, NRCS Soil Survey issued 1977
Description	Bluepoint-Kokan soils consist of somewhat excessively-drained or excessively-drained sandy and gravelly soils. Madurez-Wink association soils consist of level to moderately sloping, well-drained	
Geology/Hydrogeology		
Formation	Upper Santa Fe Group (OTs) and Quaternary Alluvium (Qa)	Geologic Map of New Mexico, 2003
Description	OTs: Pleistocene to Miocene sands and gravels of the Upper Santa Fe Group. Qa: Quaternary alluvium deposits of Holocene to Upper Pleistocene including deposits of higher gradient tributaries bordering major stream valleys.	

Physical Setting Information		Source
Estimated Depth to Groundwater*	Approximately 80 feet in the western portion and 400 feet in the eastern portion of the site	USGS Water Scientific Investigations Map 3301, 2014
Hydrogeologic Gradient*	Generally towards the southeast.	USGS Groundwater Map Powell and McKean, 2014

* The groundwater flow direction and the depth to groundwater, vary across the site, due to a cone of depression from the pumping of municipal wells in the area. Without the benefit of on-site groundwater monitoring wells, depth and flow direction cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify past uses for indications of RECs. Copies of historical documents are included in Appendix C.

3.1 Historical Topographic Maps

Readily available historical USGS topographic maps were reviewed to evaluate land development in connection with the site. Reviewed historical topographic maps are summarized below.

- n Hubbell Spring, New Mexico, published 1952 (1:24,000)
- n Hubbell Spring, New Mexico, published 1952, photorevised 1967 (1:24,000)
- n Hubbell Spring, New Mexico, published 1952, photorevised 1974 (1:24,000)
- n Hubbell Spring, New Mexico, 1991 (1:24,000)
- n Hubbell Spring, New Mexico, **1996** (1:24,000)
- n Isleta, New Mexico, **1952** (1:24,000)
- n Isleta, New Mexico, published 1952, photorevised **1967** (1:24,000)
- n Isleta, New Mexico, published 1952, photorevised **1974** (1:24,000)
- n Isleta, New Mexico, **1991** (1:24,000)
- n Albuquerque West, New Mexico, **1954** (1:24,000)
- n Albuquerque West, New Mexico, **1960** (1:24,000)
- n Albuquerque West, New Mexico, published 1960, photorevised **1967** (1:24,000)
- n Albuquerque West, New Mexico, published 1960, photorevised **1972** (1:24,000)
- n Albuquerque West, New Mexico, **1990** (1:24,000)
- n Albuquerque East, New Mexico, **1954** (1:24,000)
- n Albuquerque East, New Mexico, published 1960, photorevised **1967** (1:24,000)
- n Albuquerque East, New Mexico, published 1960, photorevised **1972** (1:24,000)
- n Albuquerque East, New Mexico, **1990** (1:24,000)

Historical Topographic Maps

Direction	Description
Site	Undeveloped land, a radio range station, and several undeveloped roads (1952, 1967, 1974, 1991, and 1996).
North	Undeveloped land, and several undeveloped roads followed by the Tijeras Arroyo (1954); undeveloped land, several undeveloped roads followed by a landing strip and the Tijeras Arroyo (1967, 1972, and 1990).
East	Undeveloped land, and several undeveloped roads (1952 and 1967); undeveloped land, and several undeveloped roads followed by Kirtland Air Force Base (1974, 1991, and 1996).
South	Undeveloped land and several undeveloped roads (1952, 1967, and 1974); undeveloped land, several undeveloped roads, (1991 and 1996).
West	State Highway 47 (Broadway Boulevard), followed by undeveloped land and various developed and undeveloped roads and structures (1952 and 1967), State Highway 47 (Broadway Boulevard), followed by undeveloped land and various developed and undeveloped roads, structures and the Interstate-25 State Highway 47 interchange to the southwest (1974); State Highway 47 (Broadway Boulevard), followed by undeveloped land and various developed and undeveloped roads, structures, the Interstate-25 State Highway 47 interchange to the southwest and the south Broadway and Mesa Del Sol landfills to the northwest (1991).

3.2 Historical Aerial Photographs

Selected historical aerial photographs were reviewed at approximately 10 to 15 year intervals, if readily available, to obtain information concerning the history of development on and near the site. Evaluation of these aerials may be limited by a photo's quality and scale. Selected photographs are summarized below.

- n University of New Mexico (UNM), Earth Data Analysis Center (EDAC), **1935, 1951, 1954, 1967, 1975, 1982, 1996, 2004, 2014** (1:40,000)
- n Google Earth, **2005, 2006, 2007, 2009, 2011, 2012, 2013, 2017, 2018** (variable scale)

Historical Aerial Photographs

Direction	Description
Site	Undeveloped land (1935 - 1954); undeveloped land and dirt roads (1967 - 1975); undeveloped land, dirt roads, and an area showing disturbance of soils at the central northwest portion of the site (COA Sludge Amendment Facility [former, after 1989]) (1982 – 2018).

Direction	Description
North	Undeveloped land followed by the Tijeras Arroyo (1935 - 1954); an area of disturbed land is present adjacent northwest of the central portion of the site (South Broadway Landfill) (1982 - 2018); undeveloped land and areas with soil grading within the northeastern portion of the Mesa del Sol property, but not included as the site (2006); a number of buildings, roads, and parking lots within the northeastern portion of the Mesa del Sol property, but not included as the site (2007-2018); the addition of a Federal Aviation Administration tower within the northeastern portion of the Mesa del Sol property, but not included as the site (2009-2018).
East	Undeveloped land (1935 - 1967); undeveloped land followed by Kirtland Air Force Base (1975 - 2018).
South	Undeveloped land (1935 - 2018).
West	Undeveloped and cultivated land (1935 - 1967); roads and a mixture of undeveloped land and commercial and industrial development followed by cultivated land (1975-2018).

The COA Sludge Amendment facility, located in the central portion of the site, and the adjacent west South Broadway landfill are not considered RECs in connection with the site as further discussed in Section 3.9.

3.3 Historical City Directories

The Polk and Hudspeth city directories used in this study were made available through the Albuquerque Main Library (selected years reviewed: 1935, 1940, 1945, 1951, 1955, 1960, 1965, 1970, 1975, 1980, 1985, 1990, 1996, 2000, 2005, 2010, and 2015) and were reviewed at approximate five-year intervals, if readily available. Since these references are copyright protected, reproductions are not provided in this report. Street listings for the site were not available.

Historical City Directories

Direction	Description
Site	No listings available.
North	5724 Broadway Boulevard SE : No listings prior to 2005; <u>Midway Auto Sales and Parts</u> (2005); Not listed (2010, 2015). 5401 Watson Drive SE : No listings prior to 2010; Fidelity Investments (2010, 2015).
East	5201 Hawking Drive SE : Street not listed.
South	No listings available.
West	5815 Broadway Boulevard SE : No listings prior to 1996; Clarence Deluna (1996, 2000); <u>A-1 Auto Salvage</u> (2005, 2010, 2015). 7201 Broadway Boulevard SE : No listings prior to 2005; C.H. Taylor Co. (2005, 2010, 2015).

Direction	Description
	<p>7705 Broadway Boulevard SE: No listings prior to 1996; <u>New Mexico Salvage Pool</u> (1996, 2000); <u>CoPart Salvage</u> (2005); not listed (2010); residence, <u>CoPart Salvage Auto Auctions</u> (2015).</p> <p>7707 Broadway Boulevard SE: No listings prior to 2000; C.H. Midway, an auto salvage facility, was identified as an occupant of 5724 Broadway Boulevard SE, located adjacent north of the northwest corner of the site, in the 2005 city directory. This facility is further discussed in Section 4.1.

A-1 Auto Salvage was identified as an occupant of 5815 Broadway Boulevard SE, located adjacent west of the northwest corner of the site, in the 2005 through 2015 city directories. This facility is further discussed in Section 4.1.

New Mexico Salvage Pool and CoPart Salvage were identified as occupants of 7705 Broadway Boulevard SE, located adjacent west of the northwest portion of the site, in the 1996 through 2015 city directories. This facility does not represent a REC to the site based on Terracon’s review of regulatory information.

Albuquerque Trap Club was identified as an occupant of 9617 Broadway Boulevard SE, located adjacent west of the southern portion of the site, in the 2015 city directory. This property also adjoins an outlying portion of the site to the north. Based on review of historical aerial photographs, this facility was developed sometime between 1935 and 1951 and has been used

for trap shooting since that time. The shooting line at the facility is located 200 feet from the nearest site boundary, and shot is dispersed away from the site. Based on the distance from the site, this facility is not considered a REC in connection with the site.

3.4 Historical Fire Insurance Maps

Historical fire insurance maps produced by the Sanborn Map Company were requested from GeoSearch to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn Maps were not available for the site.

3.5 Site Ownership

According to information provided by the client, the current owner of the site is Land Advisors Organization.

3.6 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.7 Environmental Liens and Activity and Use Limitations

The GeoSearch regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. In addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.8 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the site.

Interviews

Interviewer	Name / Phone #	Title	Date/Time
Alayna Thompson	Rick Bressan / 505-803-0881	Property Owner	January 19, 2018 / 9am

Terracon interviewed Mr. Rick Bressan, the property owner, over the phone on January 19, 2018. Mr. Bressan is not aware of environmental concerns at the site, besides the former Sludge Amendment areas located on the site. Mr. Bressan indicated that to his knowledge, the only concern associated with the former sludge facilities are elevated soil salinity. Mr. Bressan is aware of the Kirtland Air Force Base located 1.2 miles east of the site, where a bulk fuel release occurred (discussed further in Section 4.3). Mr. Bressan was not aware of any pending, threatened or past environmental litigation, proceedings or notices of possible violations of environmental laws or liability or potential environmental concerns in connection with the site.

3.9 Prior Report Review

Terracon completed two previous Phase I Environmental Site Assessments, as described below.

- n Phase I Environmental Site Assessment
Mesa del Sol 3,040-Acre Tract, Southeast Albuquerque, New Mexico
Dated: March 10, 2008
Prepared by: Terracon Consultants
For: National City Bank

In the 2008 ESA, the site was undeveloped land, with the exception of a Federal Aviation Administration (FAA) tower, and dirt roads. The COA South Broadway Landfill (including the southern portion named the Mesa del Sol Landfill) was developed adjacent northwest of the site in the 1970s and continued to operate until approximately 1990.

Historically the COA South Broadway Landfill had a Sludge Amendment facility associated with it on the central-northwest portion of the site (Exhibit 2). Assessment activities performed at the South Broadway Landfill and Sludge Amendment facility included the collection of soil and groundwater samples. The soils within the Sludge Amendment facility were not affected by metals exceeding regulatory screening levels. Groundwater sampling indicated that the facilities have not impacted groundwater above federal drinking water standards. Terracon did not identify RECs associated with the South Broadway Landfill and Sludge Amendment facility.

Terracon identified a REC associated with the proposed use of groundwater wells to supply the Mesa del Sol development with potable water, due to the potential for the wells to affect local groundwater gradient and direction, which may cause nitrate plume migration from the mixed commercial and industrial development to the west and the McCormick Ranch explosives test range associated with the Kirtland Air Force Base to the east. Terracon recommended additional investigation of this REC if groundwater wells were to be developed on site. A copy of Terracon's previous ESA is included in Appendix D.

- n Phase I Environmental Site Assessment
Mesa del Sol, New Mexico
Dated: December 17, 2015

Prepared by: Terracon Consultants
For: PNC Bank

At the time of the 2008 report, the site consisted of approximately 2,780 acres of predominantly undeveloped land located in the Mesa del Sol. Since 2008, portions of the site were developed with existing buildings, I-25, and various roadways and utilities, however developed portions of the property were excluded from the scope of the assessment on the 2015 ESA. Groundwater impacts from nitrates were identified as a REC to the site; however, monitoring data had shown that COA Broadway Landfill and the McCormick Ranch were not impacting groundwater at the site. Terracon recommended the pursuit of a comfort letter from the State of New Mexico indicating that the site owners are not responsible for the nitrate release. In addition, Terracon recommended that consideration should be given to the location of future groundwater supply wells on the site regarding existing groundwater nitrate plumes and more current data regarding the landfill monitoring should also be considered prior to use of groundwater.

4.0 RECORDS REVIEW

Regulatory database information was provided by GeoSearch, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
BF	Brownfields Management System	0.5	0
SEMS	Superfund Enterprise Management System	0.5	0

Database	Description	Distance (miles)	Listings
SEMSSEARCH	Superfund Enterprise Management System Archived Site Inventory (i.e., CERCIS NFRAP)	0.5	5
NPL	National Priorities List	1	0
DNPL	Delisted National Priorities List	1	0
EC	Federal Engineering Institutional Control Sites	Site	0
ERNS	Emergency Response Notification System	Site	0
LUCIS	Land Use Control Information System	0.5	0
RCRAG	Resource Conservation & Recovery - Generator	Site and Adjoining	5
RCRAC	RCRA - Corrective Action Facilities	1	1
RCRAT	RCRA Act - Treatment Storage & Disposal Facilities	0.5	2
NLRRCRAG	No Longer Regulated RCRA Generator Facilities	Site and Adjoining	0
NLRRCRAT	NLR RCRA Non-CORRACTS TSD Facilities	0.5	0
RCRANG	RCRA Non-generator (Not currently Regulated)	Site and Adjoining	0

State/Tribal Databases

Database	Description	Distance (miles)	Listings
ERNSNM	Emergency Response Notification System	Site	0
AST	Aboveground Storage Tanks	0.25	4
CEPCS	Compliance and Enforcement Program Cleanup Sites	1	40
NMIC	Sites with Institutional Controls	0.5	1
NMLST	Leaking Aboveground and Underground Storage Tanks	0.5	5
PST	Petroleum Storage Tanks	0.25	16
SWLF	Solid Waste Facilities	0.5	7
US	SW Research and Information Center Uranium Sites	0.5	0
UST	Underground Storage Tanks	0.25	13
LUST	Leaking Underground Storage Tanks	0.5	5
LST	Leaking Aboveground and Underground Storage Tanks	0.5	5
VRP	Voluntary Remediation Program Sites	0.5	3
USTR06	Underground Storage Tanks - Tribal Lands (Region 6)	0.25	2
LUSTR06	LUST - Tribal Lands (Region 6)	0.5	0

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for ASTM-required listings for identified facilities within 500 feet. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

The database includes all of the Mesa del Sol property, while the site, as defined for this assessment, excludes all of the developed portions of the property (see Appendix A). As a result, the database lists properties that are included in the Mesa del Sol property, but not within the site. The approximated distances and directions provided in the table below have been revised to correspond to the site boundaries. As a result, a number of facilities listed in the database report are not listed below, as their updated approximated distance from the site boundaries exceeded ASTM-required search distances and/or were not considered to pose an environmental concern to the site.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Albuquerque Studios 5650 University Blvd SE	Adjacent to site in all directions	RCRAG	No, based on discussion below
Materion, Advent Solar, Applied Materials 5600 University Blvd SE	Adjacent to the north, south, and east	RCRAG	No, based on discussion below
MSR-FSR LLC 5600 University Blvd. SE, Ste A	Adjacent to the north, south, and east	RCRAG	No, based on discussion below
City of Albuquerque South Broadway Landfill	North-adjacent / up-gradient	SEMSARCH, NFRAP, SWLF	No, based on discussion below
Midway Auto Sales & Parts 5724 Broadway SE	North-adjacent / up-gradient	RCRAG	No, based on discussion below
Broadway and Murray / Mountain View Remediation / CEI Enterprises 6501 Broadway Blvd SE	West-adjacent / up-gradient	VRP, IC, LST, LUST, PST, SEMSARCH, UST	CREC , based on discussion below
Valley Livestock Auction 7715 Broadway SE	West-adjacent / up-gradient	CEPCS, PST, UST	REC , based on discussion below
A-1 Auto Salvage 5815 Broadway SE	West-adjacent / up-gradient	RCRAG	No, based on discussion below
Groendyke Aviation Fuel Spill 6346 St Rd. 47	Approximately 120 feet / west / up-gradient	CEPSC	No, based on discussion below
McCartham Dairy 6363 St. Rd 47	Approximately 120 feet / west / up-gradient	CEPCS	REC , based on discussion below

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
New Mexico Terminal Service / Formerly Cal-Maine Egg Farm / Foods / Sunny Fresh 9615 Broadway SE	Approximately 450 feet / west / up-gradient	CEPCS, LST, LUST, PST RCRANGR, VRP	REC , based on discussion below
Storage Systems, LLC 9220 Broadway SE	Approximately 500 feet / west / up-gradient	VCP	No, based on discussion below
Karler Packing (Former) 9151 Broadway SE	Approximately 550 feet / west / up-gradient	CEPCS, AST, LST, LUST, PST, UST	REC , based on discussion below

Albuquerque Studios, 5650 University Blvd SE: This facility (EPA ID# NMR000012567) is located adjacent to the site in the central portion of the Mesa del Sol property, and is surrounded in all directions by the site. The facility is registered as a RCRA SQG facility since 2007. Hazardous waste generated by the facility includes ignitable waste, chromium, lead, methyl ethyl ketone, and spent non-halogenated solvents. A compliance inspection conducted on May 27, 2015 resulted in the issuance of four paperwork violations, leading to a written informal enforcement. Based on the nature of the violations and the absence of reported releases, this facility is not considered a REC in connection with the site.

Materion, 5600 University Blvd SE (Advent Solar, and Applied Materials): This facility (EPA ID# NMR000011841) is located adjacent to the site on the northern portion of the Mesa del Sol property, and is surrounded on its northern, eastern, and southern boundaries by the site. The facility is registered as an active RCRA large quantity generator (LQG) of hazardous waste. The facility was entered into the RCRA program as a conditionally exempt SQG on September 1, 2006, and was updated to a LQG on March 28, 2013. Advent Solar, and Applied Materials Inc., formerly located at the same address, have been listed in the RCRA program as conditionally exempt small quantity generator (CESQG) facilities since 2006. Hazardous waste generated at this facility includes ignitable waste, corrosive waste, reactive waste, chromium, lead, mercury, silver, chloroform, and spent non-halogenated solvents. A compliance inspection in 2008 resulted in four violations, and a compliance inspection in 2015 resulted in three violations, which both resulted in written informal enforcement actions in those years. Based on the nature of the violations and absence of reported releases, this facility is not considered a REC in connection with the site.

MSR-FSR, LLC., 5600 University Blvd SE: This facility (Facility Registry System ID# 110043763763) is located adjacent to the site on the northern portion of the Mesa del Sol property, and is surrounded on its northern, eastern, and southern boundaries by the site. The facility is registered as an active Resource Conservation and Recovery Act (RCRA) small quantity generator (SQG) of hazardous waste. The facility was entered into the RCRA program on July 15, 2011. Hazardous waste generated at this facility includes ignitable waste and corrosive waste. A compliance inspection in 2012 did not result in violations or enforcement actions. Based

on an absence of RCRA violations or reported releases, this facility is not considered a REC in connection with the site.

City of Albuquerque South Broadway Landfill, South Broadway SE: This facility (EPA ID# NMD980622690) is located north adjacent to the central portion of the site. This facility is registered as a Superfund Enterprise Management System Archived Site Inventory (SEMSARCH) facility, No Further Remedial Action Planned (NFRAP) facility, and a solid waste facility / landfill (SWF/LF). Based on site inspections and assessment performed in 1981 and 1982, the facility was assigned a NFRAP status on October 5, 1994.

Based on a review of the City of Albuquerque and Bernalillo County South Broadway Landfill Post-Closure Certification report dated July 29, 2016, provided by the City of Albuquerque, groundwater monitoring of eight City of Albuquerque wells and one Bernalillo County well between 1989 and May 2014 did not reveal impacts to groundwater quality. Monitoring of thirteen City of Albuquerque methane wells and five Bernalillo County methane wells between 1992 and May 2014 revealed methane detections at MP-1 and MP-2, located approximately 700 and 800 feet respectively from the site's boundaries, however, the remaining wells were observed to have low or non-detectable methane concentrations. The close proximity to waste for wells MP-1 and MP-2 and the low or non-detectable methane concentrations in other wells, including the four wells closer to the site boundary than MP-1 and MP-2, indicates methane migration should not be a concern to the site. Based on the regulatory status and the absence of groundwater impacts and methane impacts in proximity of the site, this facility is not considered a REC in connection with the site. In addition, the limits of the City of Albuquerque buffer zone do not encroach onto the site, and as such, a landfill gas assessment prior to site development will not be required by the City. A copy of the Post-Closure Certification Report is included as Appendix D.

Midway Auto Sales & Parts, 5724 Broadway SE: This facility (EPA ID# NMR00009308) is located over 200 feet north-adjacent to the northwestern portion of the site (across Interstate 25) at a hydraulically up-gradient location. This facility is registered as an active RCRA CESQG facility. The facility was entered into the RCRA program as an LQG on April 20, 2004. On April 21, 2004 the facility's status was updated to a CESQG facility. Information regarding types of hazardous waste generated at the facility was not available in the report. A compliance inspection conducted on August 25, 2009 resulted in the issuance of one violation. Based on the distance to the facility, depth to groundwater and absence of reported releases, this facility does not represent a REC to the site.

Broadway and Murray / Mountain View Remediation / CEI Enterprises, 6501 Broadway Blvd SE: This facility (VRP ID# 53061005) is located over 200 feet west adjacent to the western portion of the site (west of Interstate 25) at a hydraulically up-gradient location. This 37-acre facility is registered as a Voluntary Remediation Program (VRP) site for nitrate contamination to soil and groundwater. The facility entered the VRP program April 19, 2006, and according to information provided by Ms. Jennifer Muus of the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) on January 5th, 2018, the facility was issued a Conditional

Certificate of Completion on September 14, 2006. The VRP database described the Conditional Closure, specifying that instructional controls have been emplaced, described as a deed restriction and site drainage structures. A Covenant was issued October 27, 2006. Based on the conditional closure and institutional controls, the nitrate contamination represents a Controlled Recognized Environmental Condition (CREC) to the site.

In addition, CEI Enterprises (LUST ID# 27280) is listed on the LST and LUST databases for a confirmed release from a UST (release ID# 802) reported on August 2, 1991. The status is listed as pre-investigation, and according to information received from Mr. Jack Dickey of the NMED Petroleum Storage Tank Bureau, the release at this facility has not been further investigated. Documents provided by Mr. Dickey indicate that two USTs, a 500-gallon gasoline and a 500-gallon diesel, leaked contaminants into the soil and potentially into the groundwater, which is listed to be 50 to 70 feet below ground surface. While the documents indicate that the tanks were properly closed, as additional investigations or cleanups were not performed, contamination may remain. However, based on depth to groundwater, and distance from the facility, the likelihood of groundwater contamination and migration of that contamination to the site is low, and therefore this case does not represent a REC to the site.

Valley Livestock Auction Inc., 7715 Broadway SE: This facility (UST ID# 31449) is located over 200 feet west-adjacent to the southwestern portion of the site (west of Interstate 25) at a hydraulically up-gradient location. This facility is registered on the UST and CEPCS databases. According to the database report, three USTs, including one 10,000-gallon gasoline UST were removed from the property at an unspecified date with no releases reported.

The facility was entered into the CEPCS program after nitrate impacts were discovered in domestic well samples above regulatory standards. The facility listing is currently assigned an inactive status. No further information regarding the reported elevated nitrates is available. Based on the proximity and hydraulically up-gradient location, groundwater impacts to the site are likely and as such this facility represents a REC to the site.

A-1 Auto Salvage, 5815 Broadway SE: This facility (EPA ID# NMR000005363) is located over 200 feet west-adjacent to the northwestern portion of the site (west of Interstate 25) at a hydraulically up-gradient location. This facility is registered as a RCRA CESQG Generator Facility. The facility was entered into the RCRA program on June 19, 2001 as a SQG and the registry was revised to a LQG on February 11, 2005. The facility was assigned the current CESQG status on May 12, 2005. A compliance inspection conducted in 2005 resulted in the issuance of one violation; however, violations were not issued during the most recent inspection conducted in 2008. Based on the current regulatory status and absence of reported releases, this facility does not represent a REC to the site.

Groendyke Aviation Fuel Spill, 6346 St Rd. 47: This release (Geosearch ID# 199445466) occurred at 6346 St Rd. 47, over 200 feet north of the northwestern portion of the site (across Interstate 25) at a hydraulically up-gradient location. On July 11, 2005, a tanker truck was involved

in an accident, spilling 3000 gallons of aviation fuel. The New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) oversaw the soil excavation remedial action and issued case closure on August 11, 2005. Based on the regulatory case status, this release does not represent a REC to the site.

McCatharn Dairy, 6363 St. Rd 47: This facility (CEPSC ID# 1367414132) is located over 200 feet west of the northwestern portion of the site (west of Interstate 25) at a hydraulically up-gradient location. This 25-acre facility is listed on the Compliance and Enforcement Program Cleanup Sites (CEPSC) database for total dissolved solids (TDS), chloride, and nitrate soil and groundwater contamination. The depth to groundwater is indicated to be 80 feet. According to the CEPSC listing, a Notice of Violation was issued, followed by dispute resolution, a letter of agreement, which resulted in the installation of monitoring wells. The regulatory case status is open under a Stage 1 Abatement Plan with a Stage 2 Abatement Plan proposal received December 2, 2015. The proposal has not yet been approved and a deficiency letter has been issued to the facility. Based on the regulatory case status, the distance and hydraulically up-gradient location, the groundwater impacts from this facility likely impact groundwater on the site and as such represent a REC to the site.

New Mexico Terminal Service / Formerly Cal-Maine Egg Farm / Foods / Sunny Fresh, 9615 Broadway SE: This facility (VRP ID# 53161001) is located approximately 450 feet west of the site at a hydraulically up-gradient location. Cal-Maine Foods Inc. is registered as a RCRA Non-Generator Facility, an underground storage tank (UST) facility, and a Compliance and Enforcement Program Cleanup Sites (CEPCS) facility located adjacent west of the southwestern portion of the site. Sunny Fresh is listed as a leaking underground storage tank (LUST) facility at the same location. According to the report, a LUST release was reported on July 12, 1980 and was assigned a no further action (NFA) status on May 5, 1993. Three underground storage tanks, including a 12,000-gallon diesel UST, associated with the facility were removed on an unspecified date. The facility was entered into the RCRA program on June 25, 1990, and received a non-generator status on July 2, 2002. The facility was entered into the Compliance Enforcement Program Cleanup Site (CEPCS) program for nitrates in soil and groundwater. The depth to groundwater beneath the facility is indicated to be 20-75 feet below ground surface in the database report. The latest CEPSC update in 2016 shows the status of the release is listed open under a Stage 2 Abatement Plan.

In 2005 Terracon reviewed the files pertaining to the CEPSC case. The reviewed files were provided by Mr. Justin Ball of the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB). According to the records reviewed, the facility has been used as an egg farm since the 1950s. Three USTs were removed in 1987, for which the NMED issued a closure letter in May, 1993. Cal-Maine terminated its egg production operations in 2006. On July 8, 2009, a site walk through of the facility was conducted and it was determined that a possible groundwater contamination risk was present. On September 14, 2009, a Stage 1 Abatement Plan was submitted to the NMED to investigate a septic tank and sump associated with previous egg production operations at the facility. Results of analyses of soil and groundwater samples

collected by the NMED in December 2009 indicate that the soil and groundwater were impacted by chloride, nitrate, and sulfate at concentrations exceeding the NMED screening levels. Additionally, a septic tank from, from which one of the releases is suspected to have originated, was located in the eastern portion of the property and adjacent to the site. Groundwater direction is indicated in the NMED's report to be flowing primarily to the southeast. Groundwater samples collected from monitoring well MW-9, the easternmost monitoring well in the study and the closest to the site, exhibited elevated concentrations of chloride and nitrate exceeding the NMED's screening levels. According to the files reviewed, the estimated extent of nitrate in groundwater that exceeds the NMED's screening level of 10 mg/L, has migrated onto the southwestern portion of the site.

According to information provided by Ms. Jennifer Muus of the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) on January 5th, 2018, the VRP case status is still open and active. Based on the evidence that the groundwater plume has migrated onto the site and the regulatory case status, this facility represents a REC to the site.

Storage Systems, LLC, 9220 Broadway SE: This facility (VRP ID# 53161008) is located approximately 500 feet west of the site, across Interstate-25, at a hydraulically up-gradient location. The organization Storage Systems, LLC applied for the Voluntary Remediation Program (VRP) the 19th of August 2016 for a 9.7-acre site contaminated with nitrate, chloride, and sulfate in the soil and groundwater. According to information provided by Ms. Jennifer Muus of the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) on January 5th, 2018, a Certificate of Completion was issued for this VRP facility on the 26th of May, 2017. Based on the regulatory case status, this facility does not represent a REC to the site.

Karler Packing (Former), 9151 Broadway SE: This facility (LUST ID# 28825) is located approximately 550 feet west of the site (across Interstate 25) at a hydraulically up-gradient location. This facility is listed as a former slaughterhouse and meat packing plant on the Facility Registry System database. This facility is listed on the LST and LUST databases for release No. 193, reported on January 25, 1991. The facility previously operated 5 USTs and 2 ASTs, all of which have been removed. Further information concerning remedial actions are not provided, and the case status is listed as Investigation. According to information received from Mr. Jack Dickey of the NMED Petroleum Storage Tank Bureau, the release at this facility has not been further investigated. According to Mr. Hamilton from the NMED Petroleum Storage Tank Bureau, the case is still open and active. Based on the distance from the site, this listing does not represent a REC to the site.

This facility is also listed on the Compliance and Enforcement Program Cleanup Sites (CEPSC) database for a groundwater nitrate plume. The regulatory status remains open, but inactive due to RP bankruptcy. The facility is 50 square acres and depth to groundwater is 65 feet. Assessment or cleanup actions are not reported. The CEPSC database indicates that the prospective purchaser may enter the facility into the Voluntary Cleanup Program (VCP).

Based on the CEPSC regulatory case status, the distance and hydraulically up-gradient location, the groundwater impacts from this facility likely impact groundwater on the site and as such represent a REC.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report did not list facilities in the unmapped section.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
City of Albuquerque Environmental Health Department / https://nextrequest.cabq.gov/requests	A response was received January 10, 2018, from Andrew Daffern from the Environmental Health Department. Mr. Daffern provided the closure report letter for the South Broadway Landfill, which is discussed in Section 4.1.
City of Albuquerque Fire Department https://nextrequest.cabq.gov/requests	A response was received January 4, 2018 from Lisa Scott from the Fire Department. Ms. Scott indicated that records cannot be provided without a physical address.
New Mexico Environmental Department Petroleum Storage Tank Bureau / Chris.Hamilton@state.nm.us jack.dickey@state.nm.us	A response was received January 10, 2018 from Chris Hamilton from the NMED Petroleum Storage Tank Bureau. Mr. Hamilton provided regulatory files pertaining to LUST cases in the vicinity of the site, which are discussed in Section 4.1. A response was received January 9, 2018 from Jack Dickey from the NMED Petroleum Storage Tank Bureau. Mr. Dickey provided regulatory files pertaining to LUST cases in the vicinity of the site, which are discussed in Section 4.1.
New Mexico Environmental Department Ground Water Quality Bureau / jennifer.muus@state.nm.us	A response was received January 5 th , 2018 from Jennifer Muus of the Ground Water Quality Bureau. Ms. Muus provided information concerning regulatory cases in the vicinity of the site, which are discussed in Section 4.1.
New Mexico Environmental Department Solid Waste Bureau / melissa.mascarenas@state.nm.us	A response was received January 3, 2018 from Melissa Mascarenas of the Solid Waste Bureau. Ms. Mascarenas indicated that the Solid Waste Bureau does not have records that correspond with the site.

4.3 Local Area Knowledge

The Kirtland Air Force Base is located approximately 1.2 miles east of the site. The base is the location of a 2.5-million-gallon jet fuel and aviation gas release, contaminating soil and

groundwater up to 500 feet below ground surface. The release is currently being remediated by a soil vapor extraction (installed in 2002), as well as with product recovery from groundwater wells (starting in 2007). The facility is in Stage 2 of the Abatement Process. Based on the distance to the site and the hydraulically down-gradient location, this release and open remediation facility does not represent a REC to the site.

5.0 SITE RECONNAISSANCE

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

5.1 General Site Information

Site Reconnaissance	
Field Personnel	Aaron Ezzell
Reconnaissance Date	January 12, 2018 / 9:30am
Weather Conditions	Sunny, 40 F
Site Contact/Title	Mr. Kyle Bodhaine / Client

5.2 Overview of Current Site Occupants

On the day of the site reconnaissance, the site consisted of approximately 2,783 acres of predominantly undeveloped land located in the Mesa del Sol development in southeast Albuquerque, New Mexico. The site for the purposes of this report excludes all developed properties within the Mesa del Sol property.

5.3 Overview of Current Site Operations

The site for the purposes of this report excludes all developed properties within the Mesa del Sol property. At the time of the site reconnaissance, the site did not feature any operations.

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an “X”) are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed
Site Operations, Processes, and Equipment	Emergency generators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Other processes or equipment	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels and/or containers ³ 5 gallons	
	MSDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, catch basins and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators	
	Pipeline markers	X
Electrical Transformers/ PCBs	Transformers and/or capacitors	
	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	X
	Water discoloration, odor, and/or free floating product	
	Strong, pungent or noxious odors	
Exterior pipe discharges and/or other effluent discharges		
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wells	

Underground Chemical or Waste Storage, Drainage or Collection Systems

Pipeline markers

Pipeline markers were observed in the western portion of the site (Exhibit 2A). Associated labeling indicated that the pipeline contained liquefied natural gas and was owned by NuStar Logistics, LP. Based on the high pressure that natural gas is shipped at, Terracon would expect an ongoing release to be well known. As such, this pipeline does not represent a REC to the site.

Releases or Potential Releases

Construction/demolition debris and/or dumped fill dirt

A large soil borrow pit and soil berm were observed on the central to eastern portion of the site, at the end of University Boulevard SE (Exhibit 2A). Notable odors or staining were not apparent from these areas at the time of the site reconnaissance, and no soil appeared to be imported onto the site. Based on these observations, the borrow pit and berm do not represent a REC to the site.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	Undeveloped land, Fidelity Investments and United Poly Systems north of the eastern portion of the site; Bobby Foster Road followed by undeveloped land and the COA South Broadway Landfill north of the central portion of the site; and, Allied Crane and Machinery north of the western portion of the site.
East	Undeveloped land
South	Undeveloped land
West	University Boulevard SE followed by the Isleta Amphitheater west of the northern portion of the site; Broadway Boulevard SE followed by to auto salvage yards, three construction companies, a mobile home manufacturer, a livestock auction facility and a chemical transport company east of the central portion of the site; and, Interstate 25 followed by a dumpster rental facility, a tractor sales facility, a heating and cooling contractor, two construction companies, a metal wholesaler, an equipment rental company, a mobile home manufacture, a truck rental facility, and a poultry egg production facility west of the southern portion of the site.

Indications of RECs in connection with the site were not identified during observations of the adjoining properties.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, additional services (e.g. asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

8.0 DECLARATION

I, Kent Wheeler, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Kent R. Wheeler
Regional Manager

Please provide Terracon copies of prior <u>Phase I or II ESAs</u> , <u>Asbestos Surveys</u> , <u>Environmental Permits</u> or <u>Audit documents</u> , <u>Underground Storage Tank documents</u> , <u>Geotechnical Investigations</u> , <u>Site Surveys</u> , <u>Diagrams</u> or <u>Maps</u> , or other relevant reports or documents.	
ASTM User Questionnaire		
In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must respond to the following questions. Failure to provide this information to the environmental professional may result in significant data gaps, which may limit our ability to identify recognized environmental conditions resulting in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of their actual knowledge.		
1) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.25)? <input checked="" type="checkbox"/> No ___ Yes ___ Title search not completed (If yes, explain below and send Terracon a copy of the Chain of Title report.)		
2) Did a search of recorded land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.26)? <input checked="" type="checkbox"/> No ___ Yes ___ Title search not completed (If yes, explain below and send Terracon a copy of the Chain of Title report.)		
3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)? ___ No <input checked="" type="checkbox"/> Yes (If yes, explain below) OWNER OF (2) BUSSES LOCATED IN VLOS.		
4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)? <input checked="" type="checkbox"/> No ___ Yes ___ Not applicable (If yes, explain below)		
5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? <input checked="" type="checkbox"/> No ___ Yes (If yes, explain below)		
6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of contamination at the site (40 CFR 312.31)? <input checked="" type="checkbox"/> No ___ Yes (If yes, explain below)		
Comments or explanations:		

Please return this form with the signed authorization to proceed.

Disclaimer

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquiries Rule (40 CFR §312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFR §312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. This report was made by GeoSearch for exclusive use by its clients only. Therefore, this report may not contain sufficient information for other purposes or parties. GeoSearch and its partners, employees, officers And independent contractors cannot be held liable For actual, incidental, consequential, special or exemplary damages suffered by a customer resulting directly or indirectly from any information provided by GeoSearch.

Aerometric Information Retrieval System / Air Facility Subsystem (AIRSAFS)

MAP ID# 11

Distance from Property: 0 mi. (0 ft.) X
Elevation: 5,296 ft. (Lower than TP)

SITE INFORMATION

UNIQUE ID: 1085615

PLANT ID: 1085615

NAME: SHIMIZU INSTITUTE OF TECHNOLOGY

ADDRESS: 5700 UNIVERSITY WEST BLVD. SE
ALBUQUERQUE, NM 87105

CLASSIFICATION: POTENTIAL UNCONTROLLED EMISSIONS <100 TONS/YEAR

OPERATION STATUS: PLANNED (HAS APPLIED FOR A CONSTRUCTION PERMIT)

STATE COMPLIANCE STATUS: IN COMPLIANCE WITH PROCEDURAL REQUIREMENTS

FACILITY TYPE: PRIVATELY OWNED/OPERATED

CURRENT HIGH PRIORITY VIOLATOR: NOT REPORTED

SIC DESCRIPTION: ESTABLISHMENTS ENGAGED IN THE GENERATION, TRANSMISSION, AND/OR DISTRIBUTION OF ELECTRIC ENERGY FOR SALE.

ENFORCEMENT ACTIONS

DATE ACHIEVED: 04/20/2012

DATE RECORDED: 06/26/2012

NATIONAL ACTION TYPE: OWNER/OPERATOR-CONDUCTED SOURCE TEST

ALL AIR PROGRAM: SIP SOURCE,NSR,NSPS

RESULTS OF STACK TEST AND TITLE V: STACK TEST PASSED

POLLUTANT: VOLATILE ORGANIC COMPOUNDS

ALL POLLUTION IN VIOLATION: NOT REPORTED

TYPE OF VIOLATION(S): NOT REPORTED

PENALTY AMOUNT: 0

HAZARDOUS WASTE

D002 CORROSIVE WASTE

F001 THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:
TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON
TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN
DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE
OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL
BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Resource Conservation & Recovery Act - Non-Generator (RCRANGR06)

- F002** THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F003** THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F004** THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F005** THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F006** WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
- F007** SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.
- K001** BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.
- K049** SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.
- K052** TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

Below information was gathered from the prior NFRAP update completed in 10/2013 update:

<u>ACTION</u>	<u>START DATE</u>	<u>COMPLETION DATE</u>	<u>RESPONSIBILITY</u>
SI - SITE INSPECTION	7/1/1982	7/1/1982	EPA FUND
DS - DISCOVERY	NOT REPORTED	1/1/1980	EPA FUND
PA - PRELIMINARY ASSESSMENT	NOT REPORTED	9/1/1981	EPA FUND
VS - ARCHIVE SITE	NOT REPORTED	10/5/1994	EPA IN-HOUSE

ACTION DESCRIPTIONS

SI - (SITE INSPECTION) - THE PROCESS OF COLLECTING SITE DATA AND SAMPLES TO CHARACTERIZE THE SEVERITY OF THE HAZARD FOR THE HAZARD RANKING SCORE AND/OR ENFORCEMENT SUPPORT.

DS - (DISCOVERY) - THE PROCESS BY WHICH A POTENTIAL HAZARDOUS WASTE SITE IS BROUGHT TO THE ATTENTION OF THE EPA. THE PROCESS CAN OCCUR THROUGH THE USE OF SEVERAL MECHANISMS SUCH AS A PHONE CALL OR REFERRAL BY ANOTHER GOVERNMENT AGENCY.

PA - (PRELIMINARY ASSESSMENT) - COLLECTION OF DIVERSE EXISTING INFORMATION ABOUT THE SOURCE AND NATURE OF THE SITE HAZARD. IT IS EPA POLICY TO COMPLETE THE PRELIMINARY ASSESSMENT WITHIN ONE YEAR OF SITE DISCOVERY.

VS - (ARCHIVE SITE) - THE DECISION IS MADE THAT NO FURTHER ACTIVITY IS PLANNED AT THE SITE.

CASE NAME: CAL-MAINE PARTNERSHIP, LTP

ACTIVITY TYPE: ADMINISTRATIVE - FORMAL

ACTIVITY STATUS: FINAL ORDER ISSUED

ACTIVITY STATUS DATE: 7/19/2006

LEAD: EPA

CASE STATUS DATE: 7/19/2006

DOJ DOCKET NUMBER: NOT REPORTED

ENFORCEMENT OUTCOME: NOT REPORTED

MULTIMEDIA FLAG: NOT REPORTED

ENFORCEMENT SUMMARY:

THE ANIMAL FEEDING OPERATION (AFO) AIR COMPLIANCE AGREEMENT IS EPA'S VOLUNTARY CONSENT AGREEMENT TO MINIMIZE EMISSIONS FROM CERTAIN AFOS AND TO ENSURE THOSE OPERATIONS COMPLY WITH THE CLEAN AIR ACT (CAA), THE COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION AND LIABILITY ACT (CERCLA), AND THE EMERGENCY PLANNING RIGHT-TO-KNOW ACT (EPCRA). PARTICIPATING AFOS PAY A CIVIL PENALTY BASED ON SIZE AND NUMBER OF FARMS TO RESOLVE POTENTIAL PAST AND CURRENT LIABILITY UNDER THE CAA, CERCLA, AND EPCRA AND CONTRIBUTE TO A FUND THAT WILL COVER A TWO-YEAR, NATIONWIDE MONITORING STUDY OF AFO AIR EMISSIONS.

ENFORCEMENT TYPE

ENFORCEMENT TYPE: CERCLA 109 ACTION FOR PENALTY

Below information was gathered from the prior NFRAP update completed in 10/2013 update:

<u>ACTION</u>	<u>START DATE</u>	<u>COMPLETION DATE</u>	<u>RESPONSIBILITY</u>
SI - SITE INSPECTION	3/1/1987	3/1/1987	STATE (FUND)
PA - PRELIMINARY ASSESSMENT	10/1/1986	10/1/1986	STATE (FUND)
DS - DISCOVERY	NOT REPORTED	10/1/1986	STATE (FUND)
VS - ARCHIVE SITE	NOT REPORTED	3/11/1994	EPA IN-HOUSE

ACTION DESCRIPTIONS

SI - (SITE INSPECTION) - THE PROCESS OF COLLECTING SITE DATA AND SAMPLES TO CHARACTERIZE THE SEVERITY OF THE HAZARD FOR THE HAZARD RANKING SCORE AND/OR ENFORCEMENT SUPPORT.

PA - (PRELIMINARY ASSESSMENT) - COLLECTION OF DIVERSE EXISTING INFORMATION ABOUT THE SOURCE AND NATURE OF THE SITE HAZARD. IT IS EPA POLICY TO COMPLETE THE PRELIMINARY ASSESSMENT WITHIN ONE YEAR OF SITE DISCOVERY.

DS - (DISCOVERY) - THE PROCESS BY WHICH A POTENTIAL HAZARDOUS WASTE SITE IS BROUGHT TO THE ATTENTION OF THE EPA. THE PROCESS CAN OCCUR THROUGH THE USE OF SEVERAL MECHANISMS SUCH AS A PHONE CALL OR REFERRAL BY ANOTHER GOVERNMENT AGENCY.

VS - (ARCHIVE SITE) - THE DECISION IS MADE THAT NO FURTHER ACTIVITY IS PLANNED AT THE SITE.

CASE IDENTIFIER

CASE NUMBER: HQ-2006-0936

FISCAL YEAR: 2006

CASE NAME: MCCATHARN DAIRY

ACTIVITY TYPE: ADMINISTRATIVE - FORMAL

ACTIVITY STATUS: FINAL ORDER ISSUED

ACTIVITY STATUS DATE: 5/5/2006

LEAD: EPA

CASE STATUS DATE: 5/5/2006

DOJ DOCKET NUMBER: NOT REPORTED

ENFORCEMENT OUTCOME: NOT REPORTED

MULTIMEDIA FLAG: NOT REPORTED

ENFORCEMENT SUMMARY:

THE ANIMAL FEEDING OPERATION (AFO) AIR COMPLIANCE AGREEMENT IS EPAA'S VOLUNTARY CONSENT AGREEMENT TO MINIMIZE EMISSIONS FROM CERTAIN AFOS AND TO ENSURE THOSE OPERATIONS COMPLY WITH THE CLEAN AIR ACT (CAA), THE COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION AND LIABILITY ACT (CERCLA), AND THE EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW ACT (EPCRA). PARTICIPATING AFOS PAY A CIVIL PENALTY BASED ON SIZE AND NUMBER OF FARMS TO RESOLVE POTENTIAL PAST AND CURRENT LIABILITY UNDER THE CAA, CERCLA, AND EPCRA AND CONTRIBUTE TO A FUND THAT WILL COVER A TWO-YEAR, NATIONWIDE MONITORING STUDY OF AFO AIR EMISSIONS.

ENFORCEMENT TYPE

ENFORCEMENT TYPE: CERCLA 109 ACTION FOR PENALTY

POLLUTANTS CITED

- NO POLLUTION CITED REPORTED

ADDRESS: FUELS DRIVE & RANDOLF AVENUE, KIRTLAND AIR FORCE BASE, ALBUQUERQUE, NEW MEXICO
ALBUQUERQUE, NM 87117

COUNTY: BERNALILLO

SITE DETAILS

STATUS: OPEN

SIZE ACRES: 300

CONTAMINANT OF CONCERN: DIESEL GAS

DEPTH OF WATER (FT): 495'

MEDIA IMPACTED: SOIL AND GW

REGULATORY STATUS: STAGE 2AP

ASSESSMENT OR ABATEMENT OPTION:

SOIL VAPOR EXTRACTION VIA LARGEST SYSTEM IN STATE EXTRACTING TO 475 FEET DEPTH. PRODUCT RECOVERY OFF GROUNDWATER AT 500 FEET

COMMENTS:

OVER 2.5 MILLION GALLONS OF JET FUEL AND AVIATION GAS RELEASED AT AIRBASE UNDER REMEDIATION FROM FUELING OPERATIONS. FEBRUARY 2007 DISCOVERY OF PRODUCT.

EVENT: AVIATION GASOLINE DISCHARGES CAUSED VADOSE ZONE AND GW CONTAMINATION WITH LNAPL TO 500 FT BGS.

DISCHARGE DATE: UNKNOWN

ACTION TAKEN: SVES SINCE 2000 AND LNAPL RECOVERY SINCE 2007. HWB ASSUMED REGULATORY OVERSIGHT IN 2010.

QWQB STATUS: REFERRED

CLOSED DATE: NOT REPORTED

SOLVENTS AND SPENT SOLVENT MIXTURES.

Resource Conservation & Recovery Act - Corrective Action Facilities (RCRAC)

- F003 THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F004 THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F005 THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
- F024 PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES, FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)
- P001 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
- P001 WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
- P006 ALUMINUM PHOSPHIDE (R,T)
- P015 BERYLLIUM
- P105 SODIUM AZIDE
- U002 2-PROPANONE (I)
- U002 ACETONE (I)
- U075 DICHLORODIFLUOROMETHANE
- U075 METHANE, DICHLORODIFLUORO-
- U077 ETHANE, 1,2-DICHLORO-
- U077 ETHYLENE DICHLORIDE
- U080 METHANE, DICHLORO-
- U080 METHYLENE CHLORIDE
- U108 1,4-DIETHYLENEOXIDE
- U108 1,4-DIOXANE
- U112 ACETIC ACID, ETHYL ESTER (I)
- U112 ETHYL ACETATE (I)
- U117 ETHANE, 1,1'-OXYBIS-(I)
- U117 ETHYL ETHER (I)
- U121 METHANE, TRICHLOROFLUORO-
- U121 TRICHLOROMONOFUOROMETHANE
- U122 FORMALDEHYDE
- U133 HYDRAZINE (R,T)
- U134 HYDROFLUORIC ACID (C,T)
- U134 HYDROGEN FLUORIDE (C,T)
- U140 1-PROPANOL, 2-METHYL- (I,T)
- U140 ISOBUTYL ALCOHOL (I,T)

Resource Conservation & Recovery Act - Corrective Action Facilities (RCRAC)

U154	METHANOL (I)
U154	METHYL ALCOHOL (I)
U159	2-BUTANONE (I,T)
U159	METHYL ETHYL KETONE (MEK) (I,T)
U161	4-METHYL-2-PENTANONE (I)
U161	METHYL ISOBUTYL KETONE (I)
U161	PENTANOL, 4-METHYL-
U170	P-NITROPHENOL (I,T)
U170	PHENOL, 4-NITRO-
U196	PYRIDINE
U205	SELENIUM SULFIDE
U205	SELENIUM SULFIDE SES2 (R,T)
U210	ETHENE, TETRACHLORO-
U217	NITRIC ACID, THALLIUM(1+) SALT
U217	THALLIUM(I) NITRATE
U220	BENZENE, METHYL-
U220	TOLUENE
U226	ETHANE, 1,1,1-TRICHLORO-
U226	METHYL CHLOROFORM
U227	1,1,2-TRICHLOROETHANE
U227	ETHANE, 1,1,2-TRICHLORO-
U228	ETHENE, TRICHLORO-
U228	TRICHLOROETHYLENE
U229	
U239	BENZENE, DIMETHYL- (I,T)
U239	XYLENE (I)
U240	2,4-D, SALTS & ESTERS
U240	ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS
U242	
U248	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYL-BUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS
U248	WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS
U249	ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS OF 10% OR LESS

Unlocated Sites Summary

This list contains sites that could not be mapped due to limited or incomplete address information.

No Records Found

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 10/20/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/11

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 07/01/16

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 08/03/15

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

Environmental Records Definitions - FEDERAL

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ECHOR06 Enforcement and Compliance History Information

VERSION DATE: 08/26/17

The EPA's Enforcement and Compliance History Online (ECHO) database, provides compliance and enforcement information for facilities nationwide. This database includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases.

ERNSNM Emergency Response Notification System

VERSION DATE: 10/15/17

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSNM Facility Registry System

VERSION DATE: 09/06/17

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR06 Hazardous Materials Incident Reporting System

VERSION DATE: 08/30/17

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 09/23/17

Environmental Records Definitions - FEDERAL

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System

VERSION DATE: 07/09/17

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States.

LUCIS Land Use Control Information System

VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System

VERSION DATE: 06/29/17

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NPDESRO6 National Pollutant Discharge Elimination System

VERSION DATE: 04/01/07

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

PADS PCB Activity Database System

VERSION DATE: 07/18/17

PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Environmental Records Definitions - FEDERAL

PCSR06 Permit Compliance System

VERSION DATE: 08/01/12

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 6. This region includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. PCS has been modernized, and no longer exists. National Pollutant Discharge Elimination System (ICIS-NPDES) data can now be found in Integrated Compliance Information System (ICIS).

RCRASC RCRA Sites with Controls

VERSION DATE: 11/21/17

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with institutional controls in place.

SEMSLIENS SEMS Lien on Property

VERSION DATE: 07/11/17

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs. This is a listing of SEMS sites with a lien on the property.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

Environmental Records Definitions - FEDERAL

SSTS Section Seven Tracking System

VERSION DATE: 12/08/14

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/15

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal and tribal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/12

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

RCRAGR06 Resource Conservation & Recovery Act - Generator

VERSION DATE: 10/17/17

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities currently generating hazardous waste. EPA region 6 includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

Environmental Records Definitions - FEDERAL

RCRANGR06 Resource Conservation & Recovery Act - Non-Generator

VERSION DATE: 10/17/17

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities classified as non-generators. Non-Generators do not presently generate hazardous waste. EPA Region 6 includes the following states: Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

ALTFUELS Alternative Fueling Stations

VERSION DATE: 05/16/17

Nationwide list of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE).

FEMAUST FEMA Owned Storage Tanks

VERSION DATE: 12/01/16

This is a listing of FEMA owned underground and aboveground storage tank sites. For security reasons, address information is not released to the public according to the U.S. Department of Homeland Security.

HISTPST Historical Gas Stations

VERSION DATE: NR

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

ICISCLEANERS Integrated Compliance Information System Drycleaners

VERSION DATE: 09/23/17

This is a listing of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

MRDS Mineral Resource Data System

VERSION DATE: 03/15/16

Environmental Records Definitions - FEDERAL

MRDS (Mineral Resource Data System) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS.

MSHA Mine Safety and Health Administration Master Index File

VERSION DATE: 09/01/17

The Mine dataset lists all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970. It includes such information as the current status of each mine (Active, Abandoned, NonProducing, etc.), the current owner and operating company, commodity codes and physical attributes of the mine. Mine ID is the unique key for this data. This information is provided by the United States Department of Labor - Mine Safety and Health Administration (MSHA).

BF Brownfields Management System

VERSION DATE: 11/21/17

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment. This database included tribal brownfield sites.

DNPL Delisted National Priorities List

VERSION DATE: 10/10/17

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 10/17/17

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

ODI Open Dump Inventory

VERSION DATE: 06/01/85

Environmental Records Definitions - FEDERAL

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Non-CORRACTS Treatment, Storage & Disposal Facilities

VERSION DATE: 10/17/17

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities recognized as hazardous waste treatment, storage, and disposal sites (TSD).

SEMS Superfund Enterprise Management System

VERSION DATE: 10/10/17

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs.

SEMSARCH Superfund Enterprise Management System Archived Site Inventory

VERSION DATE: 10/10/17

The Superfund Enterprise Management System Archive listing (SEMS-ARCHIVE) has replaced the CERCLIS NFRAP reporting system in 2015. This listing reflect sites that have been assessed and no further remediation is planned and is of no further interest under the Superfund program.

SMCRA Surface Mining Control and Reclamation Act Sites

VERSION DATE: 08/25/17

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Environmental Records Definitions - FEDERAL

USUMTRCA Uranium Mill Tailings Radiation Control Act Sites

VERSION DATE: 03/04/17

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

DOD Department of Defense Sites

VERSION DATE: 12/01/14

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 06/01/15

The Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. **DISCLAIMER:** This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

FUSRAP Formerly Utilized Sites Remedial Action Program

VERSION DATE: 03/04/17

The U.S. DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 10/17/17

Environmental Records Definitions - FEDERAL

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NMS Former Military Nike Missile Sites

VERSION DATE: 12/01/84

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites.

During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

NPL National Priorities List

VERSION DATE: 10/10/17

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 10/10/17

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 10/17/17

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with corrective action activity.

Resource Conservation & Recovery Act - Subject to Corrective Action Facilities

VERSION DATE: 10/17/17

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities subject to corrective actions.

RODS

Record of Decision System

VERSION DATE: 10/10/17

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (NM)

CDL Clandestine Drug Lab Locations

VERSION DATE: 07/11/13

The New Mexico Environment Department (NMED) provides this listing of clandestine drug laboratory locations where law enforcement agencies reported chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. The sources of the entries are law enforcement agencies, and the NMED has not verified the data and does not guarantee its accuracy.

DPERIMITS Discharge Permits

VERSION DATE: 03/30/16

The Ground Water Pollution Prevention Section of the New Mexico Environment Department reviews and approves for discharges that have the potential to impact ground water quality pursuant to Subparts III and V of the Water Quality Control Commission (WQCC) regulations (20.6.2 NMAC). Ground water discharge permits address a wide variety of discharges including domestic wastewater treatment plants, commercial septic tank leachfields, power generating plants, commercial laundries not served by sanitary sewers, dairies, food processing plants, commercial landfarms for treatment of contaminated soil, industrial discharges, injection wells and ground water remediation systems. This list does not include permits for mines or agricultural facilities.

IC Sites with Institutional Controls

VERSION DATE: 09/30/17

This listing includes sites with institutional controls in place, such as a deed notice utilized to close a site. Institutional controls assist in the cleanup of contaminated properties by protecting the environment and public health. The sites included on this list are regulated by the New Mexico Environment Department.

AST Aboveground Storage Tanks

VERSION DATE: 08/04/06

This database contains aboveground storage tank facilities registered with the New Mexico Environment Department (NMED). This data was last updated in August of 2006. For current aboveground storage tank information, please refer to the PST database.

PST Petroleum Storage Tanks

VERSION DATE: 07/17/17

This New Mexico Environment Department (NMED) database contains both aboveground and underground petroleum storage tank facilities with a status of currently in use, temporarily out of use, sold, removed, no data, and/or exempt. Also included in this database are facilities that were registered with the NMED in 2006 which may or may not be currently in use, and/or may have been removed or closed in place.

Environmental Records Definitions - STATE (NM)

UST Underground Storage Tanks

VERSION DATE: 08/01/06

This database contains underground storage tanks registered with the New Mexico Environment Department (NMED). This data was last updated in August of 2006. For current underground storage tank information, please refer to the PST database.

LST Leaking Aboveground and Underground Storage Tanks

VERSION DATE: 02/14/17

This listing of aboveground and underground storage tank facilities with releases is maintained by the Petroleum Storage Tank Bureau of the New Mexico Environment Department. This list also includes facilities with a No Further Action status.

LUST Leaking Underground Storage Tanks

VERSION DATE: 08/01/06

The New Mexico Environment Department (NMED) provided this listing of leaking underground storage tanks. This list was last updated in August of 2006. For current information, please refer to the LST database.

RCY Recycling Centers

VERSION DATE: 04/13/07

The New Mexico Environment Department's Solid Waste Bureau maintains this listing of registered recycling centers.

SWLF Solid Waste Facilities

VERSION DATE: 01/18/17

This database contains open registered recycling facilities, open registered collection centers, open permitted transfer stations, open registered compost facilities, tire recycling facilities, and open permitted landfills managed by the New Mexico Environment Department.

US Southwest Research and Information Center Uranium Sites

VERSION DATE: 10/18/06

This database contains information on Northwestern New Mexico uranium projects located in Navajo Country and is maintained by the Southwest Research and Information Center. This organization was founded in 1971 for the purpose of providing information to the public on the effects of energy development and resource exploitation on the people and their cultures, lands, water, and air of New Mexico and the Southwest.

Environmental Records Definitions - STATE (NM)

VRP Voluntary Remediation Program Sites

VERSION DATE: 09/30/17

The New Mexico Environment Department's Voluntary Remediation Program promotes the voluntary cleanup of contaminated properties, and encourages the redevelopment of these sites, including Brownfields, by providing a non-punitive remediation process.

CEPCS Compliance and Enforcement Program Cleanup Sites

VERSION DATE: 02/01/17

The Compliance and Enforcement Program (CEP) assures compliance with the state's Water Quality Control Commission regulations (20.6.2 NMAC) Subparts I (Corrective Action) and IV (Abatement Plan) that require cleanup of contaminated soils and ground water. If any unauthorized discharge (spill) of oil or other water contaminant occurs, those responsible will take actions to determine the impact and cleanup the site. Unauthorized discharged sites are regulated by the CEP which includes: above-ground storage tanks, pipelines, old landfills, spill sites, and a wide variety of industrial, manufacturing, processing and maintenance facilities.

1190 St. Francis Drive
Santa Fe, NM 87502-5469

Subject: City of Albuquerque/Bernalillo County
South Broadway/Mesa del Sol Landfill
Final Post-Closure Care Certification Report

Dear Mr. Dyer:

CDM Smith Inc. (CDM Smith) is pleased to present two (2) copies of the Final Post-Closure Care Certification Report (Report) for the South Broadway/Mesa del Sol Landfill (Landfill). The purpose of this report is to demonstrate compliance with the approved Post-Closure Care Plan and satisfy the post-closure certification requirement per *NMAC 20.9.6.8 N* and correspondence from the New Mexico Environment Department (NMED) relating to the original October 30, 2014 Post-Closure Care Certification Report submittal.

The City of Albuquerque (City) and Bernalillo County (County) operated and used portions of the Landfill and have shared responsibilities for monitoring, data collection and reporting during the post-closure period. This report was completed by CDM Smith on behalf of the City and County. Certification pages follow each respective City and County section. CDM Smith prepared the post-closure summary on the behalf of the City and has provided a certification for those activities.

A requirement of the Post-Closure Care Plan was to provide proof of filing of land use. A plat that was filed in 2006 can be found in **Appendix A**. An additional requirement was to submit a copy of the environmental monitoring reports to the New Mexico State Land Office (SLO). An SLO letter dated October 1, 2014 acknowledges that groundwater and methane monitoring reports have been submitted by the City and County thus fulfilling the aforementioned requirement (see **Appendix A**).

Mr James Dyer
July 29, 2016
Page 2

Final soil cover and for the Landfill was placed by the City per the Intergovernmental Agreement between the City and County dated December 5, 1989. The City and County will continue to perform routine cap maintenance activities at the site on a regular basis.

As noted, this Report was originally submitted on October 30, 2014. The NMED subsequently issued a letter on December 15, 2014 noting three issues of non-compliance and certification language that did not meet the requirements of 20.9.6.8.N(2), NMAC. The County and City have addressed the non-compliance issues as described below as well as the certification language of the report which has been revised and is included in this Report.

NMED Comment: Condition 3 of the Plan approval, dated January 2, 1992, states, "*Drainage control, vegetation and the maintenance of cover integrity and other requirements of Section 302 of the SWR shall be conducted by the City and County...*". Major erosion has occurred along the north slope of the SBLF to the extent that monitoring well SBLF-4 is buried. Due to the extent of the erosion, the side slopes require recontouring to no greater than 25% grade.

Response: The County addressed the erosional issues and reseeded the slope and top of the cell. Letter's documenting the work were sent to the NMED SWB on July 21, 2015 and October 6, 2015.

NMED Comment: Page 16 of the Plan states, "*A permanent and locked gate shall be provided at all road entrances. Appropriate signs shall be posted at all entrances which prohibit entrance by unauthorized vehicles.*" Photographs 3 and 4 show the entrances to the SBLF are not locked or gated and no signs were present.

Response: The County and City have gated and locked all entrances to the landfill and provided photographic proof in it's letter to the NMED SWB dated October 6, 2015 (County work) and April 1, 2016 (City work).

NMED Comment: The Bureau would like to note that the certification by a New Mexico registered professional engineer statement provided by the City of Albuquerque and Bernalillo County did not include the appropriate language from 20.9.6.8.N(2) NMAC.

Response: The City and County have revised the certification language to comply with 20.9.6.8.N(2) NMAC and have included in Sections 2 and 3 of this Report.

Mr James Dyer
July 29, 2016
Page 3

Even though the New Mexico Environment Department (NMED) post-closure care period has ended for the site as indicated in the 1992 approval for the Closure and Post-Closure Plan (**Appendix B**), the City and County are committed to proper landfill management and environmental stewardship. Toward that end, the City and County look forward to cooperating with the State toward developing a plan for their continuing responsibilities for the South Broadway Landfill.

Please contact CDM Smith at (505) 243-3200 with any questions regarding this report.

Sincerely,

James D. Steele, P.E.

Section 1

Introduction

The South Broadway Landfill (SBLF) is located south of Kirtland Air Force Base in Bernalillo County, New Mexico off of Bobby Foster Road (**Appendix C, Figure 1**). The SBLF was closed in May 1989 and per *Part III-Specific Facility Requirement, Paragraph 302, A.4.* of the New Mexico Solid Waste Management Regulations (SWMR), the monitoring and care period for a landfill shall be twenty-five (25) years, therefore the post-closure period concluded in May 2014. Per the regulations, within 60 days of the end of the post-closure period, a post-closure certification report is required.

Since the City of Albuquerque (City) and Bernalillo County (County) operated and used portions of the landfill and had shared responsibilities for monitoring, data collection and reporting during the post-closure period, compiling and reviewing the monitoring data was extensive. An extension for the post-closure certification report was requested in a letter from the County to NMED dated July 3, 2014. The extension was granted and the report deadline was moved to October 31, 2014 in a letter from NMED dated July 17, 2014.

The purpose of this report is to provide the NMED with a post-closure certification in accordance with *NMAC 20.9.6.8 N* as stated:

“The owner or operator shall submit a post-closure report to the department within 60 days after the post-closure period expires. The report shall include:

- (1) A summary of post-closure activities: and*
- (2) A certification by a New Mexico registered professional engineer that the post-closure requirements, and if applicable, any corrective action requirements have been completed and all conditions of the approved post-closure care plan have been satisfied.”*

The post-closure certification report is presented as follows:

- Section 2 – City of Albuquerque Post-closure Environmental Care
- Section 3 – Bernalillo County Post-closure Environmental Care

A Professional Engineer Certification page follows Sections 2 and 3.

Section 2

City of Albuquerque Post-Closure Environmental Care

2.1 Post-Closure Environmental Activities

The City performed post-closure environmental care activities in accordance with applicable regulations, the Close-out Plan for the City of Albuquerque South Broadway Landfill (Scanlon and Associates, 1989), and the 1992 NMED approval for the Closure and Post-Closure Care Plan.

In accordance with the NMED approval for the Closure and Post-Closure Care Plan, the City performed the following post-closure environmental care activities:

- The installation of eight (8) groundwater wells.
- Groundwater monitoring well sampling and analysis until May 2014.
- The installation of seventeen (17) methane monitoring wells.
- Methane monitoring well sampling and analysis until May 2014.
- Reporting of monitoring events, either solely or jointly with the County, as presented in **Appendix C, Table 1**.

2.2 Groundwater Monitoring Program

The SBLF groundwater monitoring network was completed in two phases. Under a contract with Rogers and Company, the City had the following groundwater monitoring wells installed:

- Phase I (1989) - Wells SBLF-1, SBLF-2, SBLF-3, and SBLF-4.
- Phase II (1991) - Wells SBLF-5, SBLF-6, SBLF-7, and SBLF-8.

Initial sampling of Phase I groundwater monitoring wells were completed by CDM Smith in 1989. The groundwater monitoring well locations are shown in **Appendix C, Figure 2**. The City was responsible for the sampling of all groundwater monitoring wells with the exception of SBLF-4, which was the responsibility of the County.

2.2.1 Groundwater Sampling and Monitoring

The City performed groundwater monitoring and sampling activities per the requirements set forth in applicable regulations and the Close-out Plan for the City of Albuquerque South Broadway Landfill (Scanlon and Associates, 1989) from the date of NMED plan approval through May 2014, as directed by NMED (see NMED approval for the Closure and Post-Closure Care Plan, **Appendix B**). Groundwater monitoring activities were initially performed in accordance with the 1991 SWMR, which became effective shortly prior to NMED approval of the SBLF Closure and

Post-Closure Care Plan. As presented in the 1992 Environmental Monitoring Report submitted to NMED, samples were collected and analyzed during four consecutive quarters in 1992 to satisfy requirements of *SWMR-3 Section 202.B.3.d(1)*, after which groundwater monitoring activities were performed annually as allowed by *SWMR-3 202.B.3.d(3)*.

The 1992 quarterly collected groundwater samples were analyzed for all parameters listed in Table 1 of SWMR-3 Appendix A. Subsequently samples were collected annually and analyzed for parameters found in Table 2 of SWMR-3 Appendix A and any parameters that have historically exceeded SWMR groundwater quality standards as indicated by the 1993 Environmental Monitoring Report submitted to NMED. In 1994, newly adopted SWMR became effective; however, SWMR 801.A.2 allowed closed landfills to continue groundwater monitoring for those parameters approved at closure.

An amendment to the closure and post-closure care groundwater monitoring requirements was requested by the City in October 1999. NMED responded with an approval dated October 15, 1999 allowing the following modifications to be made:

- Discontinue sampling and monitoring of wells SBLF-1 and SBLF-2 until detects of groundwater contamination are observed at wells SBLF-5 and SBLF-6.
- Reduce sampling at monitoring well SBLF-7 to every fifth year.
- Sample monitoring wells SBLF-3, SBLF-5, SBLF-6, and SBLF-8 for a reduced parameter list with the exception of every five years.

In addition to collecting samples for analyses, the phreatic surface elevation was measured at each monitoring event. This data was used to create a groundwater contour map included in each of the reports submitted to NMED listed in **Appendix C, Table 1**.

2.2.2 Groundwater Monitoring Results

For each environmental monitoring event reported to NMED, impacts to groundwater quality were not evident and therefore, corrective action measures were not required.

2.3 Methane Monitoring Program

To determine if methane migration posed a potential hazard to adjacent properties, monitoring activities began in 1992 and continued until May 2014 per the 1992 NMED approval of the Closure and Post-Closure Care Plan (see **Appendix B**).

A total of seventeen (17) methane monitoring wells were installed on the SBLF property, thirteen (13) methane monitoring wells were monitored by the City and the remaining four (4) methane monitoring wells are the responsibility of the County. The network of methane monitoring wells is shown on **Appendix C, Figure 2**. Methane monitoring wells MP-1 through MP-13 are the responsibility of the City and have been monitored to satisfy requirements of the Close-out Plan for the City of Albuquerque South Broadway Landfill (Scanlon and Associates, 1989) and terms specified in the NMED Closure and Post-Closure Plan Approval.

2.3.1 Methane Sampling and Monitoring

Samples collected from the City's 13 methane monitoring wells were analyzed as directed by NMED and outlined in the Close-out Plan for the City of Albuquerque South Broadway Landfill (Scanlon and Associates, 1989). All methane monitoring wells were sampled quarterly during 1992 (as described in the annual report submitted to NMED), after which a reduction in the sampling frequency was allowed by NMED. Methane monitoring was to be performed for certain wells depending on methane detections observed in co-related wells. This program was established in order to evaluate if methane migration from the landfill to adjacent properties was occurring. The methane monitoring activities were conducted in accordance with terms specified in the 1992 NMED approval for the Closure and Post-closure Plan.

2.3.2 Methane Monitoring Results

Monitoring wells MP-1 and MP-2 (see **Figure 2, Appendix C**) have continually had significant detectable methane concentrations throughout the post-closure care period; however, the remaining City methane monitoring wells were observed to have low or non-detectable methane concentrations. The close proximity to waste for wells MP-1 and MP-2 and the low or non-detectable methane concentrations in the other City wells indicates methane migration should not be a concern. Methane monitoring wells closest to the landfill property boundary have continually been observed with low or non-detectable methane concentrations and therefore no corrective actions were necessary throughout the post-closure period as indicated by the reports listed in **Table 1 of Appendix C**.

2.4 Notice of Violation and Response

2.4.1 Notice of Violation

On March 17, 2015 NMED issued a Notice of Violation Letter (NOV) to Bernalillo County on the South Broadway Landfill Closure. The NOV contained the same items as those items noted as non-compliant in NMED's review letter of December 15, 2014. Items 1 and 2 in the NOV letter were the responsibility of the City of Albuquerque, dealing with site access and signage.

2.4.2 City Actions Addressing NOV

Item 1 - "Failure to restrict access to the closed landfill" and Item 2 - "Failure to post signage" were attributable to the City of Albuquerque. The City corrected the violations and documented those corrections in writing with photographs in correspondence to NMED dated April 1, 2016.

2.5 City of Albuquerque Professional Engineer Certification

(Per NMAC 20.9.6.8 N., the Post-Closure Certification Report shall include a certification by a New Mexico Registered Professional Engineer.)

A signed and stamped certification page executed by a Professional Engineer on behalf of the City of Albuquerque, NM is attached to this section.

I hereby state that to the best of my knowledge, based on the review of available information and documentation, and in my professional opinion as a registered professional engineer, post-closure requirements, conditions of the approved post-closure care plan, and other items identified in the New Mexico Environment Department's January 2, 1992 approval of the Closure and Post-Closure Care Plan, for which the City of Albuquerque is responsible for, have been satisfied.

Signed James D. Steele 7/29/2016

Printed JAMES D. STEELE

Section 3

Bernalillo County Post-Closure Environmental Care

3.1 Post-Closure Environmental Activities

The County, or the City on the behalf of the County, per the Memorandum of Understanding (MOU) dated January 30, 1990, performed post-closure care activities in accordance with the 1992 Mesa Del Sol Landfill Closure and Post-Closure Care Plan approved by the NMED Secretary.

In accordance with the NMED approval for the Closure and Post-closure Care Plan, the County performed the following post-closure care activities (where work was performed on behalf of the County by another party it will be noted):

- The installation of one (1) groundwater wells (completed by the City).
- Groundwater monitoring well sampling and analysis until May 2014 (conducted by various contractors and the County).
- The installation of four (4) methane monitoring wells.
- Methane monitoring well sampling and analysis until May 2014 (conducted by various contractors and the County).
- Reporting of monitoring events, either solely or jointly with the City, as presented in **Table 1 of Appendix C**.

3.2 Groundwater Monitoring Program

The County was required to install one (1) monitoring well at SBLF. SBLF-4 was installed in July 1989 by Rogers and Company. The drilling activities were overseen by Doug Earp with the City of Albuquerque as documented in the May 11, 1990 CDM compilation of well logs for South Broadway Landfill.

The groundwater monitoring well locations are shown in **Appendix C, Figure 2**. The County performed sampling of SBLF-4, although the initial sampling event in 1989 was completed by CDM Smith.

3.2.1 Groundwater Sampling and Monitoring

The County performed groundwater monitoring and sampling activities in accordance with the 1992 Closure and Post-Closure Care Plan. Per the 1994 Annual Report submitted by Daniel B. Stephens & Associates, Inc. (DBS&A) on behalf of the City and the County samples were collected and analyzed during three consecutive quarters in 1992 by FEI and in two quarters in 1994 by DBS&A.

On April 18, 1994, the County received a Notice of Violation from the NMED Solid Waste Bureau (SWB) for not completing groundwater and methane monitoring and analysis. The County corrected these actions by contracting with DBS&A for sampling and reporting of groundwater, DBS&A completed two sampling events on behalf of the County in 1994. Upon completion of the two 1994 events the County began sampling on an annual basis.

An amendment to the closure and post-closure care groundwater monitoring requirements was requested by the City on behalf of both parties on October 1999. NMED responded with an approval dated October 15, 1999 allowing a reduced parameter list with the exception of every five years for SBLF-4.

In addition to collecting samples for analyses, the phreatic surface elevation was measured at each monitoring event. This data was used to create a groundwater contour map included in each of the reports listed in **Table 1** of **Appendix C**, which were submitted to NMED.

3.2.2 Groundwater Monitoring Results

For each environmental monitoring event reported to NMED, impacts to groundwater quality were not evident and therefore, corrective action measures were not required.

3.3 Methane Monitoring Program

A total of four (4) methane monitoring wells were installed on the SBLF property and were monitored by the County. The network of methane monitoring wells is shown **Appendix C, Figure 2**. Methane monitoring activities were performed in accordance with the 1992 Closure and Post-Closure Care Plan. As mentioned in Section 3.2.1, the County received a Notice of Violation from NMED SWB for not completing environmental monitoring and reporting. The County corrected the violation by contracting with DBS&A to complete methane monitoring at the County's methane monitoring points for the duration of 1994 as reported in the 1994 Annual Report submitted by DBS&A on behalf of the City and County.

3.3.1 Methane Sampling and Monitoring

Samples collected from the County's methane monitoring wells were analyzed quarterly starting the second quarter of 1994.

3.3.2 Methane Monitoring Results

Monitoring wells MP-14 through MP-17 have continually been observed with little to no methane detected throughout the post-closure care period; and no corrective actions were necessary throughout the post-closure period.

3.4 Notice of Violation and Response

3.4.1 Notice of Violation

On March 17, 2015 NMED issued a Notice of Violation Letter (NOV) to Bernalillo County on the South Broadway Landfill Closure. The NOV contained the same items as those items noted as non-compliant in NMED's review letter of December 15, 2014. Items 3 through 5 in the NOV letter were the responsibility of Bernalillo County, dealing with site and slope maintenance.

3.4.2 County Actions Addressing NOV

Items 3 – 5 The County corrected all issues detailed in the NOV that the County was responsible for. Letters documenting the work were sent to NMED SWB on July 21/ 2015 and October 6, 2015.

3.5 Bernalillo County Professional Engineer Certification

(Per NMAC 20.9.6.8 N., the Post-Closure Certification Report shall include a certification by a New Mexico Registered Professional Engineer.)

A signed and stamped certification executed by a Professional Engineer from the Bernalillo County follows.

I hereby state that to the best of my knowledge, based on the review of available information and documentation, and in my professional opinion as a registered professional engineer, that corrective actions, post-closure requirements, conditions of the approved post-closure care plan, and other items identified in the New Mexico Environment Department's January 2, 1992 approval of the Closure and Post-Closure Care Plan, for which Bernalillo County is responsible for, have been satisfied.

**Re: Receipt of Monitoring Reports Pertaining to Post Closure Care Plan for the South
Broadway/Mesa del Sol Landfill**

Dear Ms. Chudnoff and Mr. Daugherty:

In the approved *Mesa del Sol Landfill Closure and Post Closure Care Plan*, dated January 2, 1992, approval conditions *1a* and *2c* stipulate that Bernalillo County and the City of Albuquerque supply the New Mexico Environment Department (NMED) and New Mexico State Land Office (NMSLO) with all monitoring reports related to required groundwater and methane monitoring. This was due to the NMSLO being the property owner and lessor of past commercial leases which were in place to allow the subject landfill to operate.

This letter serves as acknowledgement by the NMSLO that the required documentation has been submitted by Bernalillo County and the City of Albuquerque, fulfilling the aforementioned approval conditions of the subject post closure care plan. Thank you for your diligence in fulfilling the requirements of the subject plan as they relate to the NMSLO.

Sincerely,

A handwritten signature in blue ink, appearing to read "Craig Johnson".

Craig Johnson
Director, Commercial Resources Division

NOTES

- 1. Bearings shown hereon are New Mexico State Plane Grid Bearings (Central Zone, NAD 83).
2. Distances are ground distances.
3. Project Grant to G-2 Factor = 0.999025215
4. The Gross Area of this tract is 12,911.66 square feet.
5. Bearings and distances along the Bernalillo County Regional Park, Business Lease #L-1394, have been adjusted to be consistent with the field evidence.
6. The location of pipeline, power line, and communication line easements and/or right-of-ways shown hereon was plotted from the granting documents in conjunction with field files of existing infrastructure.
7. Issues to all reports is provided as directed in note 36 on sheet 3 of 8.
8. All easements shown hereon were provided by Easement National Title or the State Land Office as detailed on sheet 3 of 8.

DISCLOSURE STATEMENT

The purpose of this plot is for the ownership and subdivision of the Mesa Del Sol and Le Bonita Lease areas, Albuquerque, New Mexico in conjunction with previously patented properties as shown on the plot.

LANDFILL DISCLOSURE STATEMENT

The subject property is located on a former landfill. Due to the subject property being on a former landfill, certain precautionary measures may need to be taken to ensure the health and safety of the public. Recommendations made by a professional engineer with expertise in landfill and landfill gas issues as required by the most current version of the Interim Guidelines for Development within City Designated Landfill Buffer Zones shall be considered prior to development of the site.

Any improvements incorporating into existing PNM utility easements shall require approval from PNM. The City of Albuquerque, under the authority of the City Engineer, shall pay for all PNM utility relocation or other costs caused by such easements incorporating into the NESC.

SHEET INDEX

Table with 2 columns: SHEET NO. and DESCRIPTION. Rows include: 1. TITLE SHEET, 2. TRACT BOUNDARIES & ACREAGES, 3. EXISTING EASEMENTS, 4. DETAIL SHEET, 5. DETAIL SHEET, 6. DETAIL SHEET, 7. DETAIL SHEET, 8. DETAIL SHEET.

NOTICE OF SUBDIVISION PLAT CONDITIONS

PURSUANT TO SECTION 1 OF THE CITY OF ALBUQUERQUE, NEW MEXICO SUBDIVISION ORDINANCE, A VARIANCE OR WAIVER FROM CERTAIN SUBDIVISION REQUIREMENTS HAS BEEN GRANTED BY THE CITY AND THE ALBUQUERQUE METROPOLITAN AREA FLOOD CONTROL AUTHORITY IN CONNECTION WITH THIS PLAT.

FUTURE SUBDIVISION OF LANDS WITHIN THIS PLAT, ZONING SITE DEVELOPMENT PLAN APPROVALS, AND DEVELOPMENT PERMITS MAY BE CONDITIONED UPON REGISTRATION OF RIGHTS-OF-WAY AND EASEMENTS, AND/OR UPON IMPROVEMENTS, IMPROVEMENTS BY THE OWNER FOR WATER, SANITARY SEWER, STREETS, DRAINAGE, GRADING AND PARKS, IN ACCORDANCE WITH FUTURE RESOLUTIONS, ORDINANCES AND POLICIES IN EFFECT AT THE TIME FOR ANY SPECIFIC PROPOSAL.

THE CITY LAND AMPLIA WITH REFERENCE TO ENHANCED MAY REGULATE AND/OR PERMIT EASEMENTS TO BE ADDED, MODIFIED OR REMOVED WHEN FUTURE PLATS AND/OR SITE DEVELOPMENT PLANS ARE APPROVED.

BY ITS APPROVAL OF THIS SUBDIVISION THE CITY MAKES NO REPRESENTATION OR WARRANTIES AS TO AVAILABILITY OF UTILITIES, OR FINAL APPROVAL OF ALL REQUIREMENTS INCLUDING (BUT NOT LIMITED TO) THE FOLLOWING ITEMS:

- 1. WATER AND SANITARY SEWER AVAILABILITY.
2. FUTURE STREET DEDICATIONS AND/OR IMPROVEMENTS.
3. PARK AND OPEN SPACE REQUIREMENTS.
4. CHINAIR REQUIREMENTS AND/OR IMPROVEMENTS.
5. EXCAVATION, FILLING OR GRADING REQUIREMENTS.

ANY PERSON INTENDING DEVELOPMENT OF LANDS WITHIN SUBJECT SUBDIVISION IS CAUTIONED TO INVESTIGATE THE STATUS OF THESE ITEMS.

AT SUCH TIME AS ALL SUCH CONDITIONS HAVE BEEN SATISFACTORILY MET, THE CITY ENGINEER SHALL APPROVE A RECORDABLE DOCUMENT, RESERVING SUCH CONDITIONS FROM ALL OR FROM A PORTION OF THE AREA WITHIN THE SUBJECT SUBDIVISION.

PUBLIC UTILITY EASEMENTS

PUBLIC UTILITY EASEMENTS shown on this plat are for the common joint use of:

- A. PNM Electric Services for the installation, maintenance and service of underground electrical lines, transformers, and other equipment.
B. PNM Gas Services for installation, maintenance, and service of natural gas lines, valves and other equipment and facilities.
C. GTE for the installation, maintenance, and service of all buried communication lines and other related equipment and facilities.
D. Comcast Cable for the installation, maintenance, and service of such lines, cables, and other related equipment and facilities.

Includes the right to build, install, construct, reconstruct, locate, relocate, change, remove, modify, renew, operate, and maintain facilities for the purposes described above. Together with the easements for all other public easements including sufficient working area space for electric transformers, with the right and privilege to wire and remove lines, cables or cables which interfere with the purposes set forth herein.

Comments for electric transformer/metal towers as identified and listed hereon shall be in front of transformer/metal tower doors and five feet (5') on each side.

FREE CONSENT AND DEDICATION

The foregoing plat of land herein described is with the free consent and in accordance with the desires of the undersigned owner(s) and/or proprietor(s) hereof. Said owner(s) and/or proprietor(s) do hereby consent to all of the foregoing and do hereby certify that this Bulk Plat is their free and undivided and said owner(s) and/or proprietor(s) do hereby dedicate any streets and public rights-of-way as may be shown hereon to the City of Albuquerque and do hereby grant, grant any access, utility, and drainage easements hereon, inspect, and maintain facilities thereon; and any Public Utility easements as may be shown hereon for the common and joint use of said Electrical Power and Communication Services for buried and/or overhead distribution lines, conduits, pipes for underground and/or overhead utilities as may be shown or indicated, and including the right of ingress and egress for construction and maintenance, and the right to enter interfering lines and streets. The City has the right to enter upon the Undesignated Property of any time and perform whatever inspection, installation, maintenance, repair, modification or removal "herein" it deems appropriate without liability to the City. If work affects any improvements or encroachments made by the owner, the City will not be financially or otherwise responsible for rebuilding or repairing of improvements or encroachments, if in the opinion of the City, the work to be performed by the City could endanger the structural integrity or otherwise damage the improvements or encroachments. The grantee(s) of its own expense, shall whether protective easements are required to safeguard the improvements or encroachments. Said owner(s) and/or proprietor(s) do hereby consent to all of the foregoing and do hereby certify that this subdivision is with their free and undivided.

**MESA DEL SOL
LANDFILL CLOSURE AND POST-CLOSURE CARE PLAN**

Operators: City of Albuquerque ("City")
County of Bernalillo ("County")
Facility: Class A Landfill ("Mesa del Sol")
Location: Portions of Section 20 and Section 21, T9N, R3E,
Bernalillo County, New Mexico

Pursuant to Section 302 of the New Mexico Solid Waste Management Regulations (SWMR), the New Mexico Environment Department (NMED) hereby approves the Closure and Post-Closure Care Plan of the aforementioned facility, subject to the following conditions:

1. Groundwater monitoring and corrective action shall be conducted as follows:
 - a. The City shall install and monitor from seven wells (SBLF-1 through SBLF-8 except SBLF-4) and the County one well (SBLF-4) shall be located as illustrated in Figure 2 of Attachment A.
 - b. Results of sampling and analysis shall be reported to the NMED with a copy to the State Land Office (SLO) quarterly for four quarters beginning in the first quarter of 1992, and thereafter, annually until May, 2014.
 - c. Groundwater testing parameters shall be those as indicated in Table I of Appendix A (Groundwater Water Parameters) of the Proposed Amendments to the SWMR, as adopted by the Environmental Improvement Board (EIB).

- d. If the results from monitoring the City's wells SBLF-5 or SBLF-6 show a statistically significant increase in groundwater contaminant concentrations at any time, the groundwater testing parameters for SBLF-1 and SBLF-2 shall be those as indicated in Table I of Appendix A of the SWMR, as adopted by the EIB.

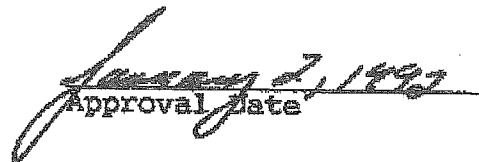

If the results from monitoring the City's wells SBLF-1 and SBLF-2 show no statistically significant increase in groundwater contaminant concentrations for the four quarters in 1992;

- i. Monitoring from these wells may be limited to the parameters of Table II of Appendix A (Groundwater Water Parameters) of the Proposed Amendments to the SWMR, as adopted by the EIB;
 - ii. Monitoring at one or both of these wells may be discontinued on approval by NMED based on submittal of a technical demonstration monitoring at SBLF-1 and/or SBLF-2 is no longer warranted;
- e. Remedial action, if required shall be conducted in accordance with Part VIII (Remedial Action) of the Proposed Amendments to the SWMR, as adopted by the EIB.
2. Methane monitoring and corrective action shall be conducted as follows:
- a. The City shall install and monitor from thirteen wells (MW-1 through MW-13) and the County four wells (MW-14 through MW-17) and the wells located as illustrated in Figure 1 of Attachment A.
 - b. Well installation and sampling procedures shall be conducted according to the notes on Figure 3 of Attachments A and B and yield representative methane concentrations. Monitoring shall be conducted by the City and County until May of 2014.
 - c. Monitoring results shall be reported to the NMED with copies to the SLO beginning in the first quarter of 1992.
 - d. All close proximity methane monitoring wells (City wells: MW-1, MW-2, MW-7, MW-8 and MW-12; County wells: MW-14 and MW-16) shall be monitored quarterly beginning the first quarter of 1992 and all other wells shall be monitored annually.

- e. If the methane concentration in the City wells, MW-1 or MW-2, exceeds the lower explosive limit (LEL), then the intermediate set of City monitor wells, MW-3 and MW-4, shall be monitored quarterly, at which time, MW-1 and MW-2 may be monitored annually. If the methane concentration falls below the LEL in MW-1 and MW-2, quarterly monitoring may be discontinued at MW-3 and MW-4 but quarterly monitoring at MW-1 and MW-2 shall continue.
- f. If the methane concentration in the City wells, MW-3 or MW-4, exceeds the LEL, then the farthest set of City monitor wells, MW-5 and MW-6, shall be monitored quarterly, at which time, MW-3 and MW-4 may be monitored annually. If the methane concentration falls below the LEL in MW-3 and MW-4, quarterly monitoring may be discontinued at MW-5 and MW-6 but quarterly monitoring at MW-3 and MW-4 shall continue.
- g. If the methane concentration in the City wells, MW-7, MW-8 or MW-12, exceeds the LEL, then the farthest set of City monitor wells, MW-9, MW-10, MW-11 and MW-13, shall be monitored quarterly, at which time, MW-7, MW-8 and MW-12 may be monitored annually. If the methane concentration falls below the LEL in MW-7, MW-8 and MW-12, quarterly monitoring may be discontinued at MW-9, MW-10, MW-11 and MW-13 but quarterly monitoring at MW-7, MW-8 and MW-12 shall continue.
- h. If the methane concentration in the County wells, MW-14 or MW-16, exceeds the LEL, then the farthest set of County monitor wells, MW-15 and MW-17, shall be monitored quarterly, at which time, MW-14 and MW-16 may be monitored annually. If the methane concentration falls below the LEL in MW-14 and MW-16, quarterly monitoring may be discontinued at MW-15 and MW-17 but quarterly monitoring at MW-14 and MW-16 shall continue.
- i. If the LEL at the wells nearest the property boundary is exceeded, corrective action is required. A corrective action plan shall be submitted to the NMED for approval within thirty (30) days of detection of the LEL at the property boundary wells by the City and/or County respective of which well(s) the LEL is detected.

3. Drainage control, vegetation, and maintenance of cover integrity and other requirements of Section 302 of the SWMR shall be conducted by the City and County in accordance with the amended close out plan for the City of Albuquerque South Broadway Landfill (Mesa del Sol Landfill Area) of May 10, 1989, and the amended Drainage Report of November, 1989 until May of 2014.
4. The City and/or County shall provide proof of filing of a detailed description of the use of the site, including a plat, with the appropriate county land recording authority for Bernalillo County to be submitted to the Department by March 30, 1992.
5. In accordance with the Solid Waste Act, financial assurance is not required to cover the costs of closure and post closure care.

CREDENTIALS**

ALAYNA THOMPSON

ASSISTANT SCIENTIST

PROFESSIONAL EXPERIENCE

Ms. Thompson joined Terracon Consultants, Inc. in July 2017. Working as an Assistant Scientist in the Salt Lake City office under the guidance of Terracon's professional science and engineering staff, which includes geotechnical engineers, geologists, geoscientists, and environmental scientists, she conducts environmental site assessments and provides soil and water sampling support.

PROJECT EXPERIENCE

Ms. Thompson has authored and provided support for a variety of Phase I Environmental Site Assessments since early 2016. She has conducted Phase Is at commercial, industrial, and residential properties. She has also conducted Phase Is for multiple miles of transportation corridors.

San Diego International Airport, San Diego, California

Assisted with the preparation of a Phase I Environmental Site Assessment at the San Diego International Airport. She assisted with the review of historical and county records, federal, state, and local agency databases, and the preparation of the report.

Caltrans I-710, Sound Walls, Compton and Bell Gardens, California

Ms. Thompson assisted with the field investigation and report preparation for this Limited Site Investigation. She led direct push sampling, interpreted laboratory results, and authored the report.

Caltrans I-10 Hazardous Materials Survey and Aerially Deposited Lead Survey, Riverside County, California

Ms. Thompson assisted with a two-phase project, the survey of over 45 bridges along the I-10 corridor and authored the report, as well as assisted with the aerially deposited lead survey and the report preparation.

Caltrans Cajalco Freeway Expansion, Riverside County, California

Ms. Thompson assisted with the preparation of an Initial Site Assessment for multiple proposed expansions of the Cajalco Freeway. She assisted with the review of historical and county records, federal, state, and local agency databases, the site inspection, and preparation of the report.

Mill Creek Wetlands, Chino, California

Ms. Thompson managed field work at the Mill Creek Wetlands constructed remediation site. She conducted surface and storm water sampling, analyzed data, and monitored inorganic and organic pollutant and pathogen levels.

J. AARON EZZELL, PE, PG

OFFICE MANAGER

PROFESSIONAL EXPERIENCE

Mr. Ezzell has over 16 years of experience, and serves as the Office Manager for Terracon's Albuquerque and Gallup, New Mexico offices. His project management experience includes personnel supervision, scheduling, technical review, report and proposal writing and review, and client relations. Project experience includes educational facilities, commercial developments, power plants, industrial facilities, and transportation projects. Mr. Ezzell has been involved in various project aspects including general construction inspection, field and laboratory construction materials testing for soils, concrete, asphalt, mortar, and grout, a wide variety special inspections, shallow and deep foundation observations, and vibration monitoring. Mr. Ezzell also has experience managing drilling operations, conducting geotechnical investigations, and performing hydrogeological site characterizations.

PROJECT EXPERIENCE

- **Montrose Airport Taxiway F – Montrose, Colorado**
 Project manager responsible for supervising and implementing the quality assurance testing plan during the rehabilitation of Taxiway F, including embankment, soil-cement, aggregate base course, and asphalt pavement installation.
- **Wal-Mart Supercenter – Pagosa Springs, Colorado**
 Project manager for construction of a new supercenter with shallow foundations, masonry walls, and concrete slab-on-grade. Associated site construction included associated parking and drive areas, a new roadway extension, and utilities.
- **US 160 & 550 CFI Lane – Durango, Colorado**
 Project manager responsible for supervising and implementing the contractor's quality control plan during construction of new concrete pavement sections, curb-and-gutter, sidewalk, and continuous flow intersection lane.
- **Aztec Pedestrian Bridge – Aztec, New Mexico**
 Project manager responsible for construction management and quality assurance during construction of a new pedestrian bridge over the Animas River.
- **College Drive & Hospital Drive Improvements- Gallup, New Mexico**
 Project manager responsible for quality control on NMDOT roadway improvement project including retaining walls, curb-and-gutters, sidewalks, and new asphalt pavement sections.
- **Church Rock Elementary School – Church Rock, New Mexico**
 Project manager for construction of a new single-story elementary school with a footprint of about 45,000 square feet and auger-cast-in-place foundations. Associated site construction includes associated parking, drive areas, utilities, and play areas.

Kent Wheeler, PG

REGIONAL MANAGER / VICE PRESIDENT

PROFESSIONAL EXPERIENCE

Mr. Wheeler's responsibilities include providing environmental-related consulting services encompassing a wide range of projects, from Superfund liability associated with property transactions and hazardous waste cleanups to groundwater and soil-contaminant investigations. His expertise lies in the compilation and evaluation of hydrogeologic data, including subsurface soil and groundwater information, synthesizing the data with potential release scenarios and developing integrated management strategies. The development of innovative risk-based remedial strategies have provided substantial savings to a diverse group of clients, including prospective sellers and purchasers of real estate, industrial, and commercial clients with CERCLA, RCRA, and LUST issues.

Mr. Wheeler has extensive experience interacting with regulatory agencies, including EPA, Utah Voluntary Cleanup Program (VCP), Utah DERR, Utah DSHW, UDOT, and Utah DAQ. He interacts closely with clients, lawyers, and regulatory personnel on a routine basis, acting as Senior Project Manager on many large environmental projects. He has managed CERCLA Investigations and Removal Actions, RCRA Facility Investigations and Remedial Actions, SMCRA Mine Reclamation projects, LUST Investigations and Corrective Actions, Air Quality Permitting actions and provided review and consultation to legal counsel on numerous large-scale property investigations. During his tenure, Mr. Wheeler has provided expert witness services on a variety of cases, including PCBs, mine reclamation, groundwater contamination, snow hydrology, and geology.

PROJECT EXPERIENCE

UTA Light Rail and FrontRunner Property Acquisition, Salt Lake City, Utah

When Utah Transit Authority (UTA) initially started developing the idea for a light-rail system in Utah in the mid-1990s, they recognized there would be significant potential environmental liabilities associated with the properties. They came to IHI Environmental, a Terracon Company, to help them with the environmental due diligence needed for the acquisition of right-of-ways and other properties associated with the more than 100 miles of rail line acquisition. Mr. Wheeler was an integral part of this team that developed plans and procedures in conjunction with UTA, Union Pacific Railroad, Utah DEQ, and EPA to ensure that UTA's efforts met all of the requirements to qualify as an innocent landowner and/or a bona fide prospective purchaser. Mr. Wheeler acted as the Senior Project Manager and Principal in Charge for all UTA work from 1995 to 2010. This included the review of over 2,000 Phase I ESAs or Property Screens and hundreds of Phase II Site Investigations.

By outlining and limiting future land uses of the rail corridor through an agreement with EPA, the team was able to significantly reduce time, effort, and costs associated with Site Investigations and remedial actions. The implementation of this program saved over \$6 million on just a single project described below.

Mr. Wheeler managed the Pallas Yard CERCLA project from the initial identification of the site during a Phase II ESA through the final closure of the site, using a Non-time Critical Removal Action overseen by EPA. This site involved the identification, assessment, and remediation of a mile-long railroad yard that was impacted by high levels of arsenic and lead. Because this rail yard was a key

WORK HISTORY

Terracon Consultants, Inc., Senior Principal & Regional Manager, September 1, 2012-Present

IHI Environmental, Inc., Chief Operations Officer, 2007-2012; Manager, Environmental Services & Senior Hydrogeologist, 1989-2007

EnviroSearch, Hydrogeologist, 1988-1989

State of Utah, Division of Oil, Gas & Mining, Reclamation Hydrologist, 1987-1988

component in the Utah Transit Authority's light-rail project in Salt Lake City, it had to be completed within 18 months of the initial contact with EPA. By using a Brownfields approach of "starting with the end in mind," this project was designed and managed in a manner that resulted in savings of over \$6 million to the client. In addition, the project was completed within 18 months, from the initial site investigation through the completion of the Removal Action. Mr. Wheeler worked closely with EPA and Utah DERR personnel throughout the project to ensure the timely closure of the property.

This expedited time frame required almost weekly, if not, daily contacts with the client, legal counsel, EPA, UDEQ-DERR, and several PRPs, including Union Pacific Railroad and ASARCO, as well as property owners along the right-of-way. EPA cited this site as an example of how to expedite the investigation and restore CERCLA sites.

Interstate 15 Environmental Compliance, Salt Lake City, Utah

When Interstate 15 was reconstructed in Salt Lake City, just prior to the 2002 Winter Olympics; Wasatch Constructors selected IHI to lead the environmental compliance effort. This linear project also used the defined land use restrictions in the road corridor to significantly reduce Site Investigation and remedial action costs. Mr. Wheeler led the team during the reconstruction project. This included asbestos and lead-paint surveys and abatements on hundreds of structures within the proposed roadway corridor. Phase I ESAs were conducted on all properties taken as part of the reconstructions, and Phase II Site Investigations for all properties with identified environmental issues, including over 25 former gasoline stations, and two CERCLIS listed site, and one CERCLA site. Significant issues dealt with in a short time frame included LUST and UST sites, CERCLA issues, RCRA waste issues, lead-based paint, stormwater, and wastewater discharges.

Voluntary Cleanup Program, Salt Lake City, Utah

Mr. Wheeler acted as the Senior Project Manager for the remediation and closure of the former Utah Barrel facility through the Utah Voluntary Cleanup Program (VCP). This cleanup was negotiated and implemented on a fast track, allowing the client to receive tax credits and LEEDS credits for the development. The innovative design of the remediation allowed the removal and disposal of PCBs, lead- and arsenic-impacted soils, as well as the remediation of a petroleum-contaminated groundwater plume, in less than 8 months. The ability to complete this work from site investigation to remediation under the oversight of the VCP in this short time frame allowed the project to be financially viable.

Voluntary Closure of Oil Pipeline Pump Station, Salinas, California

Mr. Wheeler was the Senior Project Manager of a subsurface investigation and remediation effort of a former pumping station for an oil pipeline outside Salinas, California. The facility had been a pumping station along a crude oil pipeline in the early 1900s. The site investigation included defining soil impacts and groundwater impacts, and determining the extent of a free product plume. Over two acres of land were impacted from the surface to over 25 feet below ground surface (bgs). A Risk Assessment was used to establish Action Levels and a Corrective Action Plan (CAP) was prepared that eliminated the exposure pathways and protected groundwater. Approximately 12,000 yds³ of the most highly impacted soils were excavated and mixed with less impacted soils; this material was placed above groundwater and capped with low permeability soils to stop infiltration. This project was performed for the Church of Jesus Christ of Latter-day Saints. Costs for using traditional remediation technologies ranged from \$850,000 to \$1,500,000. Mr. Wheeler's innovative approach cost the client less than \$350,000.

Methane Extraction and Monitoring, Provo, Utah

During the development of a large regional mall in Provo, Utah, methane-bearing soils were encountered underlying the footprint of the building. The site had to be investigated and the extent and source of the methane plume determined. A soil vapor extraction system was then designed and installed, while allowing construction activities to continue. Mr. Wheeler oversaw the engineering and construction plans and oversaw the installation and operation of the system. Through the active extraction process, methane concentrations were reduced to safe levels in all targeted areas of the development and a passive extraction system is now in place.

Complex Property Transactions

As the Senior Environmental Professional and Senior Reviewer for property transactions for the last 20 years, Mr. Wheeler has overseen the completion of thousands of Phase I ESAs and Limited Site Investigations (Phase II SI). The property issues have included CERCLIS and RCRA sites, leaking underground storage tanks, construction waste

landfills, suspect lease operations, Brownfields, wetlands issues, vapor intrusion, and groundwater impacts from on- and off-site sources. The sites were impacted by a wide variety of contaminants, including PCE and TCE, PCBs and PNAs, lead, arsenic, mercury, and petroleum hydrocarbons. Mr. Wheeler works closely with many attorneys, corporate managers, and regulatory personnel in evaluating risks associated with potential property acquisitions. Working in this environment, Mr. Wheeler recognizes the need to identify and quantify risks quickly, and identify workable solutions.

RCRA Hazardous Waste Identification and Disposal, Salt Lake City, Utah

Mr. Wheeler was the Project Manager for the cleanup of an aerospace manufacturing facility that had declared bankruptcy. This cleanup involved characterizing and disposing of over 5,000 gallons of liquid hazardous wastes and caustic chemicals and chlorinated solvents, as well as the characterization and disposal of approximately 50 unmarked drums containing hazardous wastes. This project was performed for Wells Fargo Bank.

PCE Plume Investigation and Remedial Action, Salt Lake City, Utah

Mr. Wheeler acted as the Senior Project Manager for the voluntary RCRA investigation of a large PCE plume in Salt Lake City. The plume extended approximately .5 mile from the facility under adjoining properties. The investigation included designing a Sampling Plan that not only defined soil impacts in the source area to a depth of over 50 feet, but a network of monitoring wells that were sufficient to define a .25 mile-long groundwater plume. Additionally, because of the high concentrations, vapor monitoring was required in residential houses to ensure de minimis exposures to homeowners. This initial stage also included the design of a removal action of source material that extended over 30 feet below the ground surface. Mr. Wheeler worked with the State to allow the majority of the soil to be disposed of as non-hazardous wastes, resulting in significant savings.

Key Bank Tower Building Implosion

During the redevelopment of the City Creek Center in downtown Salt Lake City, Mr. Wheeler oversaw the environmental permitting and compliance associated with imploding the Key Bank Building. At that time, the State Division of Air Quality had an “unofficial” hold on issuing permits for building implosions in the Salt Lake air shed. Mr. Wheeler was retained to write and obtain the permit and oversee the air quality monitoring before, during, and after the event. He was selected as the Senior Project Manager because of his strong relationships with the regulatory agencies and his knowledge and proven abilities to move projects through the regulatory system.

APPENDIX F
DESCRIPTION OF TERMS AND ACRONYMS

Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Above Ground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.

Term/Acronym	Description
CESQG	Conditionally exempt small quantity generators.
CFR	Code of Federal Regulations
CREC	Controlled Recognized Environmental Condition is defined in ASTM E 1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clear Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E 1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

Term/Acronym	Description
ILP	Innocent Landowner/Operator Program
LQG	Large quantity generators.
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	National Priorities List, as more particularly described under the Records Review section of this report.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/l	Pico Curies per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in Pico Curies per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ("cradle to grave"). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA generators list is part of the RCRIS database maintained by EPA and lists facilities that generate hazardous waste as part of their normal business operations, as more particularly defined under Section 4.1 of this report.

Term/Acronym	Description
RCRA CORRACTS/TS Ds	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TS Ds	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. <i>De minimis</i> conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small quantity generator.
SWF	Solid Waste Facility
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-0513, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	Voluntary Cleanup Program
VOC	Volatile Organic Compound

Term/Acronym	Description
Wetlands	<p>Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.</p> <p>The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.</p>
